

The changing face of business collaboration in the wake of COVID-19

As we adapt to a world changed by COVID-19, powerful yet easy-to-use collaboration tools have become all the more critical for a remote workforce to connect, communicate, and collaborate efficiently. This was seen in recent GlobalData Research commissioned by Telstra where **two-thirds** of respondents across Asia, Europe, and the United States said that COVID-19 had changed their organisations forever, and **93%** reported incremental changes to their IT priorities.

Facts and Stats

74% of organisations globally are introducing new or expanding existing investments in **cloud-based collaboration applications** such as **Microsoft Teams**.¹

44 million daily active **Microsoft Teams** users in March 2020, making it Microsoft's fastest-growing business application.²

98% of enterprises believe there will be enhanced reliance on **remote collaboration to replace face-to-face meetings** post COVID-19 recovery.¹

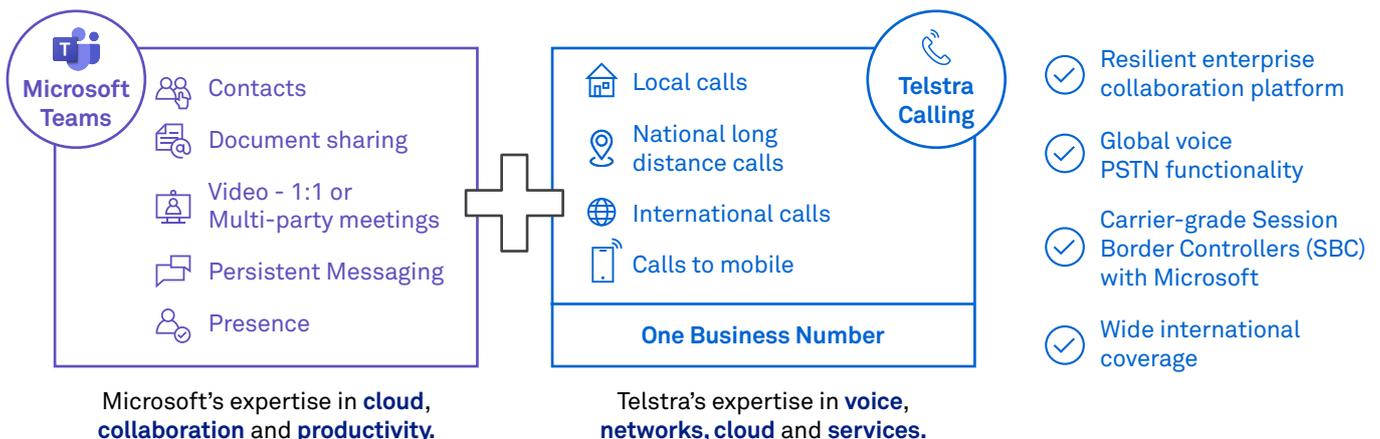

“Video is the new voice in collaboration. The data also shows a shift in culture that could be with us for many years, if not permanently... this increased reliance will also be important to help drive cost savings and improve employee work-life balances.”¹

Solution features and benefits
