Fleet Complete GPS
Tracking Solution

Turn Fleet Data Into Powerful Insights

Fleet Complete GPS Tracking Solution

With over two decades of expertise, Fleet Complete provides advanced GPS fleet management solutions designed for businesses ranging from small to medium enterprises to global industry leaders. Streamline your operations, enhance safety and sustainability, and reduce costs with Fleet Complete's powerful, scalable solutions that support fleet management and facilitate business growth.

What is Fleet Complete Telematics?

Fleet Complete's GPS tracking solution is a web-based fleet management platform that collects data from your vehicles.

Advanced software analytics transform raw vehicle data into actionable insights, enabling visibility of your mobile workforce and helping you to better run your business.

Near real-time and historical vehicle data gives you access to key information, such as location, vehicle health, and driver performance. You can access a wide variety of reports to better manage your fleet.

Fleet Complete offer fleet management solutions customised to meet the specific needs of your fleet. Whether it's software or hardware, Fleet Complete's fleet tracking ecosystem delivers a wide array of additional add-ons, establishing it as the ideal one-stop solution to enhance both your fleet and your business.

Gain better visibility of your fleet

– Helps you manage safer operations
– Improved Productivity
– Helps you lower operating costs
– Better customer service
– Green your fleet operations

Key features

Locate your vehicles in near real-time

With Fleet Complete user-friendly map functionality, you can view the location of your vehicles and their status on one interface.

Detailed metrics and reporting

Help you make informed decisions around your fleet and resources with in-depth analysis on KPIs.
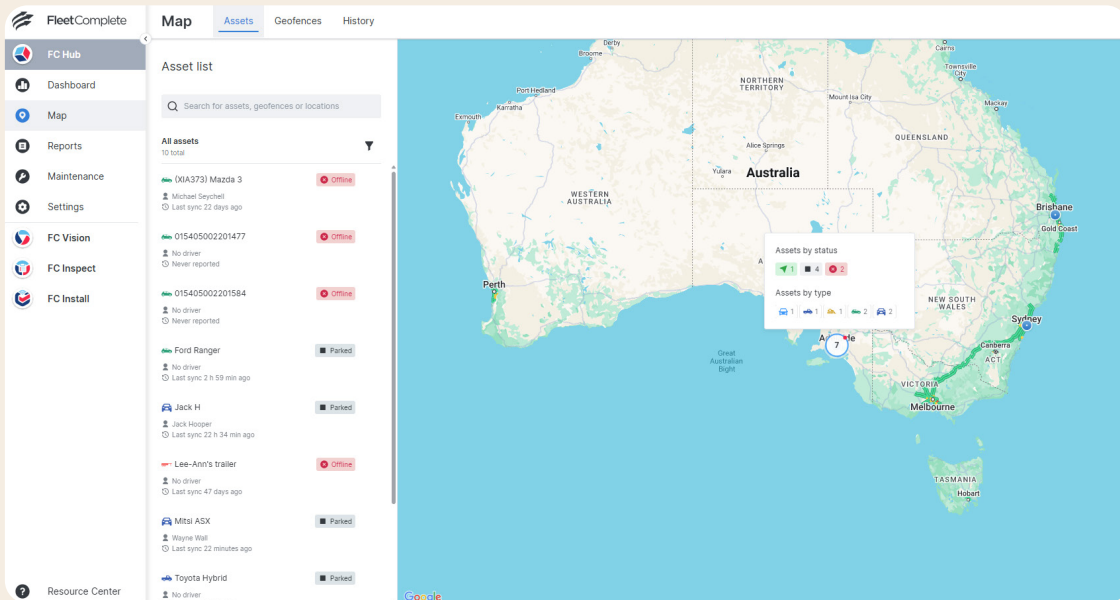

Identify inefficiencies in your operations

Historical trip data gives you the opportunity to evaluate your fleet utilisation. It can help you improve daily route efficiency and ensure the best chance of maximum output is achieved each day, reducing overtime costs.

Access through web portal

You can access your information from the Fleet Complete web portal, including on a mobile device.

Help reduce your total cost of ownership

Proactively manage maintenance

Create a maintenance calendar and automatically send service reminders to drivers or fleet managers, whether scheduled by time or triggered by vehicle usage.

Detect engine issues fast

Electronic Control Module (ECM) integrations enable alerts to be triggered when a fault code is detected, so you can more quickly address issues.

Prevent unnecessary vehicle wear and tear

Generate detailed reports to see how your vehicles are being driven by reviewing events such as harsh cornering, braking and speeding.

Reduce fuel usage

Certain driver behaviour, such as idling and aggressive acceleration, increase fuel consumption, causing your monthly business costs to inflate.

Vehicle inspection reporting

With Fleet Complete easy-to-use mobile applications, drivers can log minor and major vehicle defects that are sent directly to the Mechanic Portal. Now you can provide your fleet maintenance staff with access to data to review and conduct the necessary repairs.

Generate a safer environment for your drivers and assets

Driver performance coaching

With routine fleet performance reports and driver scorecards, you can identify areas of improvement for your drivers and reward those who are performing well.

Accident notifications

Vehicle collision notifications and data retrieval allow you to take steps.

Better safety for your assets

Get notified of unwanted asset activity to prevent theft or after-hours use.

Provide better service to your customers

Improved dispatch and response times

Utilise near real-time tracking to help you locate the nearest driver for optimal dispatch and inform your customers of unexpected delays.

Proof of service

Alert customers to completed deliveries by sending them notifications as the driver leaves their location.

Provide more accurate arrival estimates

Inform customers as to how far away a driver might be from their destination.

The smooth running of your fleet is your ultimate business card

Fleet Complete solutions offer you tools so that you can get the most out of your fleet performance and assist you in providing better customer service.

Simplified project management

The Fleet Complete Task Tracker application will help manage assignments and projects on one interface. See all open, pending and completed jobs on one screen and manage your mobile personnel accordingly.

Why Telstra and Fleet Complete?

Fleet Complete has partnered with Telstra to maximise its service offering with Australia's proven mobile network in reach, expertise and support. Our customers enjoy several distinct benefits from this partnership, including:

National coverage

As a partner of Telstra, Fleet Complete has access to a network with more 4G coverage than anyone else. Iridium satellite service is available for connectivity outside cellular network range.

Solutions customised for your business

Help your business run smoothly and efficiently with advice from a Telstra Business Specialist. Telstra has over 1,000 specialists nationwide to give you face-to-face personalised help.

Global support

As one of the world's fastest-growing fleet telematics businesses, we have a passionate team in place locally that is backed by global support. We are here to help our customers thrive.

A scalable platform and additional solutions for your fleet

Enterprise Fleet Management with MyGeotab

MyGeotab is a comprehensive fleet management platform tailored for a wide range of vehicles, from passenger cars to off-road equipment. It provides detailed tracking and data insights, including support for electric vehicles, making it ideal for complex, enterprise-level fleet operations.

Vehicle Telematics with Fleet Complete Unity Platform

Fleet Complete Unity Platform caters to businesses seeking a simpler yet robust track-and-trace solution. While less complex, it remains a data-rich platform, perfectly suited for smaller fleets or those requiring straightforward vehicle monitoring and management.

Solution	Description	MyGeotab	Fleet Complete Unity Platform
Asset Tracker	Have you got non-powered assets sitting in the yard unsupervised? Now you can remotely monitor your valuable assets and their operational status from your mobile device and get alerted to unauthorised activity	Available with AT5 and AT7 asset trackers	Available with AT1 asset tracker
Vision Camera	The Vision Camera boosts driver safety with dual-facing cameras and Al, detecting behaviours like speeding, tailgating, harsh braking, and distracted driving. It alerts drivers in near real time and records footage for fleet managers to enhance safety and efficiency	Available	Available
FBT Reporting	The Electronic Logbook solution is a simple and convenient way to automate your time-consuming vehicle logbook	Available	Available
Remote Solution	Satellite, Dash Duress and Remote Pendant creates a solution that operates outside the mobile network coverage to help with safety of staff, vehicles and assets*	Available	Available

Things you need to know

Fleet Complete GPS Tracking solutions consist of two different hardware and software combinations, based on either the FC Unity Platform Platform or the MyGeotab Platform. The GO9 and MyGetoab solution is not compatible with the FC Unity Platform Platform.

The FT1 and FC Unity Platform Platform is the latest GPS Tracking solution available from Fleet Complete and integrates with other optional add-on solutions, including Asset Tracker and FBT Reporting. The FC Unity Platform solution is not compatible with the Iridium Add-on or Satellite Unit.

* In order to use a satellite add-on you need to purchase a Satellite unit from us and separately take up a satellite service from Fleet Complete or another third-party provider.
