Managed Cost Optimisation Services

Take control of your investments

Telstra's managed cost optimisation solutions help customers take control of their investments with data and insights necessary to make informed business decisions on future communications strategy.

Together with our industry partners, Telstra provides the assurance that the technology behind a customer's business is expertly managed, giving them peace of mind.
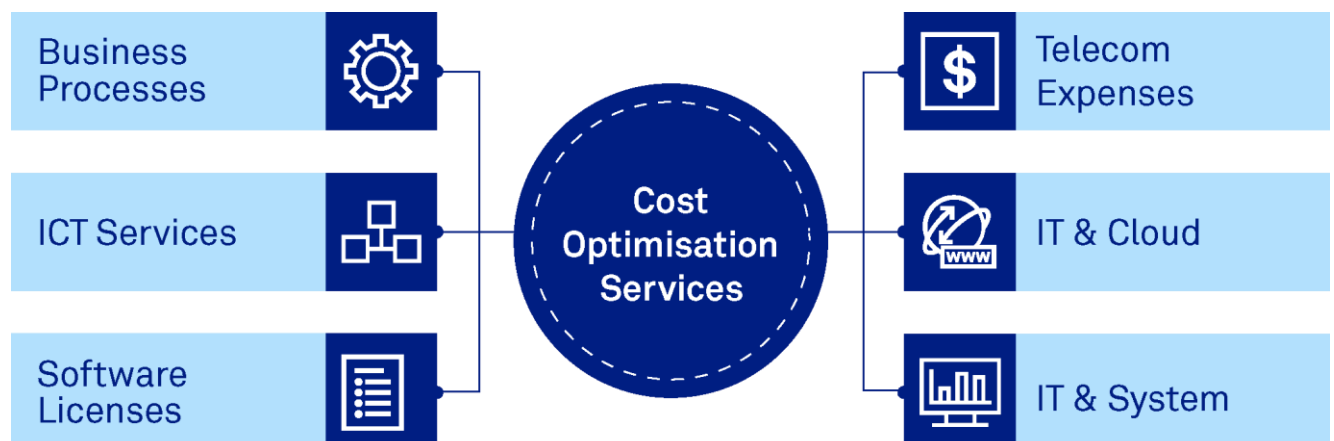

Our solutions enable customers to:

- Liberate their workforce
- Get better value through transparency of costs
- Access easy analytics
- Make decisions based on data
- Facilitate optimisation of committed and planned investments

A great opportunity for enterprises to improve on usage based spend

Our solutions help customers drive cost and spend optimisation, while maximising business value, through a business focused continuous effort. This may include consolidating data from various sources, obtaining the best pricing and terms for all business purchases, standardising, simplifying and rationalising platforms, applications, processes and services.

Cost optimisation journey

Our team of solution experts analyse your current expense environment to help identify complexity, bottlenecks, non-value generating elements and process improvements.

Our approach includes

- Review of existing cost optimisation business processes
- Interviews and workshops with your representatives
- Identify opportunities for efficiencies or cost savings
- Prioritisation of improvement opportunities
- Implementation planning for recommended improvements

Our deliverables include

- Optimised telecommunications and ICT investments
- Complete visibility of assets and services
- Cloud strategy and migration roadmap
- Universal view of measurable spend and consumption

Our value added services include

- Dedicated or premium consulting support
- On-site support for customers requiring domain expertise
- Customised or bespoke billing formats and billing feeds

Let us help you reduce complexity, inefficiency and the cost of processing associated with managing and reporting on your complete ICT investments.

Visibility and control of entire technology fleet

Customised and scalable

Better customer advocacy

One Solution Multiple Benefits

Reduced complexity

Cost saving

Improved productivity
