

Plan for a successful move to Telstra Calling for Office 365

Two Days Consulting Workshops

Delivered by our team of world leading consultants and solution design specialists

Pilot Workshop

Two days consulting workshop exploring your organisational structure and operations to plan for the pilot deployment of Telstra Calling for Office 365.

We help you:

- Identify functional team or individuals best placed to pilot the solution, for a pilot of 100 users
- Create a customised Statement of Work that explores:
 - Business benefits of the solution
 - Relevant Microsoft Office 365 licencing implications and dependencies
 - Critical success factors
 - Service adoption methodology
 - PSTN in-dial and PBX dial plan implications
 - Telephony migration strategy for the rest of your organisation
 - Dependencies on external factors e.g. ISDN end of sale, nbn

Fees: AUD \$3,300 ex GST per workshop

For more information, talk to your Account Executive today.

Planning Workshop

Two days consulting workshop exploring your technical landscape, existing ICT roadmaps, strategic business imperatives and operational concerns.

We help you:

- Assess the overall readiness of your technical landscape and existing ICT environment
- Explore strategic business imperatives
- Identify operational concerns of your IT organisation
- Envision the solution
- Formulate approach to the migration of your unified communications and collaboration capabilities to the cloud

Modern Workplace Workshop

Two days consulting workshop exploring the strategic imperatives, collaboration and telephony operational requirements of your organisation.

You will get a customised Statement of Work that explores:

- Streamline/optimisation of business processes
- Building employee engagement
- Improving user and customer experience
- How to achieve organisational strategic goals
- Current unified communications and telephony capability gaps, risks and opportunities.
