

Webex for TIPT

Supporting your people's evolving workstyles - Bring your teams together through voice, video, chat, and more with Webex for TIPT.

An all-in-one cloud collaboration solution

TIPT and Liberate is a complete unified communications solution that's simple, flexible, scalable, and highly reliable. It enables you to deliver calls securely with one simple cloud collaboration solution across the desktop and mobile.

Simple but effective collaboration

You can now simplify your calling experience even further by adding Webex for TIPT, a simple and intuitive app for your users. Work with the tools you love, as Webex integrates into your desktop applications such as Outlook, Microsoft Teams, and Slack to deliver the experience you're after. Whether you're at a desk, on the go, or together in a meeting room, Webex helps speed up projects, build better relationships, and solve business challenges. It has all the team collaboration tools you need to help keep work moving forward and connects with the other tools you use to simplify life.

Key features

TIPT cloud calling: A secure and feature rich calling experience across desk phone, desktop, and mobile platforms delivered with all the flexibility of the cloud.

- Click to call from Webex, Outlook, Microsoft Teams, Slack, and more.

Reliable collaboration. Choose to grow your calling solution by improving two of the most common elements of workplace collaboration—messaging and meetings.

- **Messaging:** Message, file share, and one-click calling in always-on spaces with people inside and outside your organisation. Chat individually or in groups with always-on messaging. Plus, easily edit, delete, forward, flag, pin, and mark messages as unread.
- **Meeting:** High-def meeting, integrating scheduling, rich AI-powered transcriptions, noise cancelling, and people insights

Get work done with one app. Go on video meetings, call, message, share, and collaborate, all from one simple and secure Webex app.

Connect from any compatible device. Webex works on PCs and Macs, as well as iOS and Android smartphones and tablets.

Always-on content. Know where your content is with persistent spaces. Quickly and easily find people, spaces, messages, and files.

Personal and public. Select what and when to share, meet, or call within and outside of your organisation.

Latest updates. Stay up to date with the latest application at your fingertips.

Single sign-on. Join Webex to your organisation's active directory and let your users sign on simply.

Secure. Help keep your information safe and secure with TIPT and Webex.

Benefits

Webex for TIPT delivers a wealth of benefits for your business, including:

- **Support multiple workstyles.** Connect, communicate, and collaborate with your office or remote teams with video and messaging. Whether your people are at home, in the office, on the road, or in any time zone, they can get together virtually with ease from desktop or mobile device.
- **Facilitate internal and external collaboration.** Webex extends the value chain beyond your company's boundaries, enabling your people to work closer not only with their colleagues, but also with partners, suppliers, and customers.
- **Stay agile.** TIPT and Liberate with Webex helps to empower you with flexibility and ease, allowing you to scale features and numbers of users up and down as your needs change. This way, you can adapt and act faster in an evolving business landscape.

Webex options with your TIPT service

You can add Webex with your TIPT service as a feature bundle, with the option to choose from Softphone, Basic, Standard, and Premium packs.

- Softphone is available for no additional charge within the TIPT Standard and Executive feature packs
- Webex may be added to the TIPT Standard and Executive Packs

Collaboration made easy

Features matrix

Feature	Description
Softphone app	Software application that enables user devices (PC, Android, or iOS) to make and receive video and voice calls
Messaging with Teams and Spaces	In the Webex app, all your work takes place within spaces and teams. Here you can send messages, make calls, have video meetings, share files and whiteboards. <ul style="list-style-type: none"> • Spaces work well for a group of people working on a specific topic. • Teams help you keep everything organised by putting multiple spaces under a common theme. Teams are for a consistent group of people who are going to be working on something for a long time.
File Sharing	Simply drag and drop files with a colleague or in a space for your whole team and the files you receive are neatly organised, searchable and saved. Integrate with key content management apps, such as SharePoint and Box, to work directly on documents from within your Webex spaces.
Desktop and application screen sharing	Share your entire screen or just a specific app or a document, without additional downloads or separate web collaboration apps. Sharing can be done from your desktop and everyone can view it from a desktop, tablet or smartphone. View in full screen or zoom in or out for better viewing.
Full screen and gallery view	Create a more intimate and engaging meeting experience. Advanced and flexible video layouts can, drag and drop participants, stage and stack to your liking, scroll between participants or use slider controls to customise view. Decide who and what you want to focus on by customising your stage view.
Multi-party chat	During meetings, desktop and mobile participants can chat with one and another to increase meeting effectiveness.
Web guest experience	Simple external collaboration: Easily collaborate with anyone outside your organisation by simply adding their email address to a space. Guests can join Webex meetings in several ways.
Whiteboarding/ Annotation	Sometimes a quick sketch explains an idea better than words. In Webex, you can create a whiteboard and draw on it to share your ideas as you work and changes are saved automatically.
Space meetings	Schedule a meeting or start an ad-hoc meeting with everyone in your space with a single click. And the bonus: everyone's a host so anyone in the space can start the meeting.
Personal Meeting Room (PMR)	Enjoy your own private and secure online meeting room with a dedicated phone number where teams can participate in HD audio, video, messaging and screen sharing.
Device Pair with Cisco endpoints	Connect with intelligent Webex devices: <ul style="list-style-type: none"> • Share content wirelessly. When you connect to a Cisco Webex Board, desk or room device, you can share content wirelessly when you're not in a call or meeting from your Webex app. • Join a Webex Room Device. You can search for a particular device, use the device to join a meeting, or make a call, then optimise audio or video of the shared content.
Join from a video system (CMR)	Cisco Collaboration Meeting Rooms (CMR) enable everyone to meet using virtually any device, for a business-quality video collaboration experience that combines video, voice and content share technologies.
Call in Audio#	Voice dial-in number to join a meeting.
In-app meeting scheduler	Schedule Webex scheduled and Personal Room meetings directly in the Webex app. You can add people to invite, select the time, and Webex automatically sends an email to the people you invited with the meeting details.
Lock Meeting	Keep uninvited people from joining your meeting by locking it after you start it from Webex. If you don't lock your meeting, anyone who has the meeting link can join it. When you lock a meeting, you can see who's waiting to join and let individual people in, or let everyone in at once.
Recording (Cloud)	Record meeting for people who can't attend or for those who want to refer back to what was discussed. Recordings are conveniently stored in your individual or group space for future review.
Transcriptions	Never miss a meeting detail with live meeting transcription and closed captioning.
Floor Control	Host meeting controls to make sure meeting run smoothly. Controls include change host, mute, unmute, mute and unmute all, and expel.

Feature	Description
Present / Password Protection Controls	Control various aspects of the meeting to manage the administrative side of the meeting.
Media Quality Statistics	Understand how your meeting is performing based on your network and system conditions with the in-meeting health checker.
Remote Desktop Control	Enable meeting attendees to remotely control shared software.

Note: features available to users are dependant on Webex feature pack selected.

System requirements for Webex

Webex is supported on specific versions of Windows, Mac, iPhone, iPad, Android, and web. Review these system requirements below to verify that you can use Webex on your computer, mobile device, or web browser. These requirements are continuously reviewed and may be revised.

For further information and the latest guidelines, see system requirement details [here](#).
