

T-Rooms Additional Services

Simple meeting rooms. To a T.

Sometimes you don't have the time or background to ensure everything is set up in your IT environment to get the best outcome from your new T-Rooms. Whether you just need some guidance, or you want someone there to help things along we have a service package to suit:

T-Rooms Assessment

Participate in a workshop to better understand which technologies are available and get guidance on the appropriate solutions for your physical spaces and underlying collaboration platform.

T-Rooms Training And Adoption

Help your teams get the most out of your meeting room solutions and increase adoption with a comprehensive training program that's tailored to your needs. Train an internal trainer, a number of champions, or train all your staff. It can include simple to follow guides that are customised and branded for your organisation.

T-Rooms Audit

If you don't have the time or resources to complete a room audit, we can conduct a physical audit of all your existing meeting rooms for you. The audit will include measurements, determine wall reinforcing requirements for your builder, identify potential audio issues, and help you decide the best T-Rooms configuration for each room audited.

T-Rooms Platform Workshop

Help your ICT stakeholders understand the practical application of your chosen collaboration platform across a range of disciplines; including solution architecture, network traffic flow, and naming conventions all the way through to account creation, operational management and monitoring tools.

T-Rooms Microsoft Teams Enablement Service

This Enablement Service helps you identify any prerequisite actions that need to be completed within your Microsoft Teams environment to enable Microsoft Teams Room systems to register and utilise the Microsoft Teams communications platform. Telstra will also provide advice on the necessary remediation actions that need to be completed to ensure successful enablement of the Microsoft Teams Room Systems.

T-Rooms Large Deployment Project Management

For larger deployments that require extra co-ordination in room availability, logistics, working in with builders, and bulk setup and configuration. This service is designed to make it easy and straight forward to deploy many rooms in a large site or across the country.
