

Managed Video Surveillance

See your organisation through a new lens while protecting what matters

When it comes to your organisation, there's nothing more important than protecting the safety of your employees, customers, public spaces and assets.

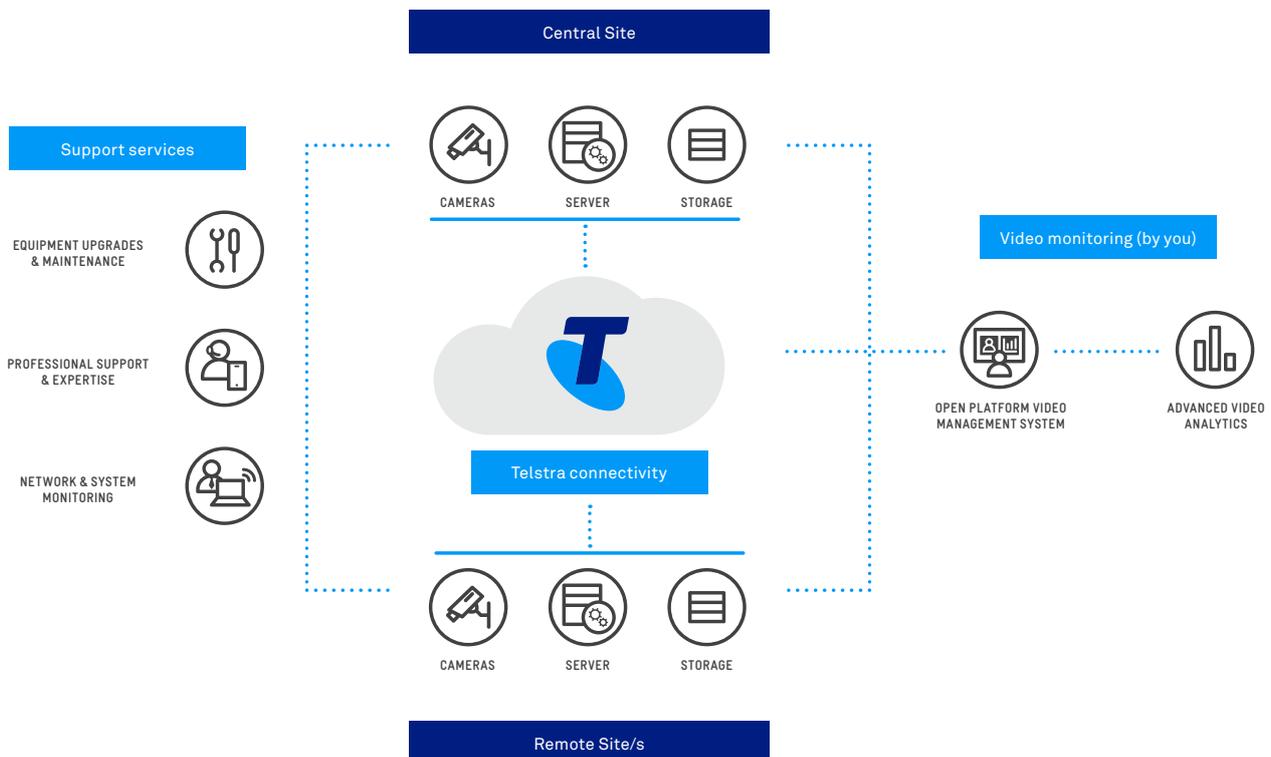

However, with a large-scale video surveillance network, maintaining reliable operations can become complex. Many organisations lack the required time and expertise. This can result in compromised or inefficient event identification, response and compliance reporting. Ultimately, your safety and security suffers.

Managed Video Surveillance from Telstra can help overcome these problems. It's ideal if you have multiple sites and want one, open-platform video surveillance system and actionable business intelligence to optimise operations.

The solution provides scalable video surveillance and advanced analytics, bundled with security services and related communications. Delivered as an end-to-end managed service, it's proactively maintained so you can focus on core business activities.

Our best-of-breed partnerships with leading security providers offer the simplicity and assurance of one point of contact. Plus you benefit from flexible commercial offerings to suit your organisation.

Your video surveillance professionally managed end-to-end by Telstra

Organisational Benefits

Rely on a single trusted provider to fully manage your video surveillance

Gain peace of mind that every aspect of your video surveillance system is being professionally managed end-to-end. From design and installation through maintenance, monitoring, support and day-to-day management of your camera and communications networks, our security experts will handle all your video surveillance service needs.

Simplify and optimise your video surveillance with reliable, integrated infrastructure and services

Take advantage of the latest technologies with a robust, reliable and fully scalable networked surveillance solution that's ready for the future. Preventative maintenance can also extend the life of your investment.

Improve your security and drive operational excellence with advanced analytics

Support better decision making and enhance operational efficiency with actionable intelligence from large security data sets. Respond to events in real time with live and remote access to surveillance feeds and analytics.

Features

Telstra Managed Video Surveillance is scalable, so you can deploy part of the solution now and continue to add features as you need them. Our network of security specialists will help you design a video surveillance solution that works best for your organisation.

Professional support and expertise

Gain access to a network of security professionals to manage your surveillance and related services, relieving internal resourcing pressure. Our Information Technology Infrastructure Library (ITIL) based service assurance program helps simplify how we support your infrastructure.

With experience working across industries and technical expertise spanning the design, build and project management of system infrastructure, our experts tailor security solutions that address your unique needs.

Equipment upgrades

Make the most of your investment in existing infrastructure with solutions that integrate seamlessly. Complete necessary technology and infrastructure upgrades with the benefit of flexible commercial offerings including the ability to amortise over your chosen contract term.

Open platform video management systems

Centralise and streamline disparate video surveillance systems to gain greater visibility, control and cost efficiency. We provide you with the right open-platform video management system tailored to help meet your organisational needs.

Network and system monitoring

Our carriage network and system monitoring is delivered through secure communications infrastructure. Your surveillance data is delivered securely and reliably over Australia's largest and fastest IP network.

Cloud enabled

Cloud based models support scalability and flexibility. You can rely on our strengths in cloud and networks as well as cyber-security to integrate these critical services into one fully managed service.

Advanced analytics

Rapidly search, locate and share events to increase threat detection and forensic capability with speed and accuracy. Add analytics applications, based on camera capability and data, including facial and demographics recognition, licence plate recognition, object detection, people counting, traffic heat mapping, queue management and more.

Smart technology

Leverage our smart technology expertise to adopt technologies and devices such as smart lighting, smart parking, video management, IP surveillance and wireless intrusion detection for public safety.

Why Telstra for Managed Video Surveillance?

Flexible commercial offerings

Leverage flexible commercial models so you can avoid large up-front investments and deploy on your own terms.

Best of breed partnerships

We have partnered with leading security providers to combine their expertise with the skills of our extensive in-house security team. Through this integrated ecosystem, we bring you cutting edge technologies to drive continuous innovation.

Security convergence

We are uniquely positioned to help you with your electronic and cyber security needs, and support a holistic approach to security across your organisation.

Integrated managed services

Benefit from having an integrated solution for data and security managed seamlessly by one provider. Bundling services delivers savings, while the fully managed service enables you to focus on your core business.

Compliant

Infrastructure installation is compliant with applicable Australian Standards.
