

# Improve performance, governance and security in your Hybrid Cloud environment

Empowering transformation means meeting business units' needs for agile and scalable IT

**Complex**

You need IT that connects to cloud services and third parties

Customers, vendors, partners

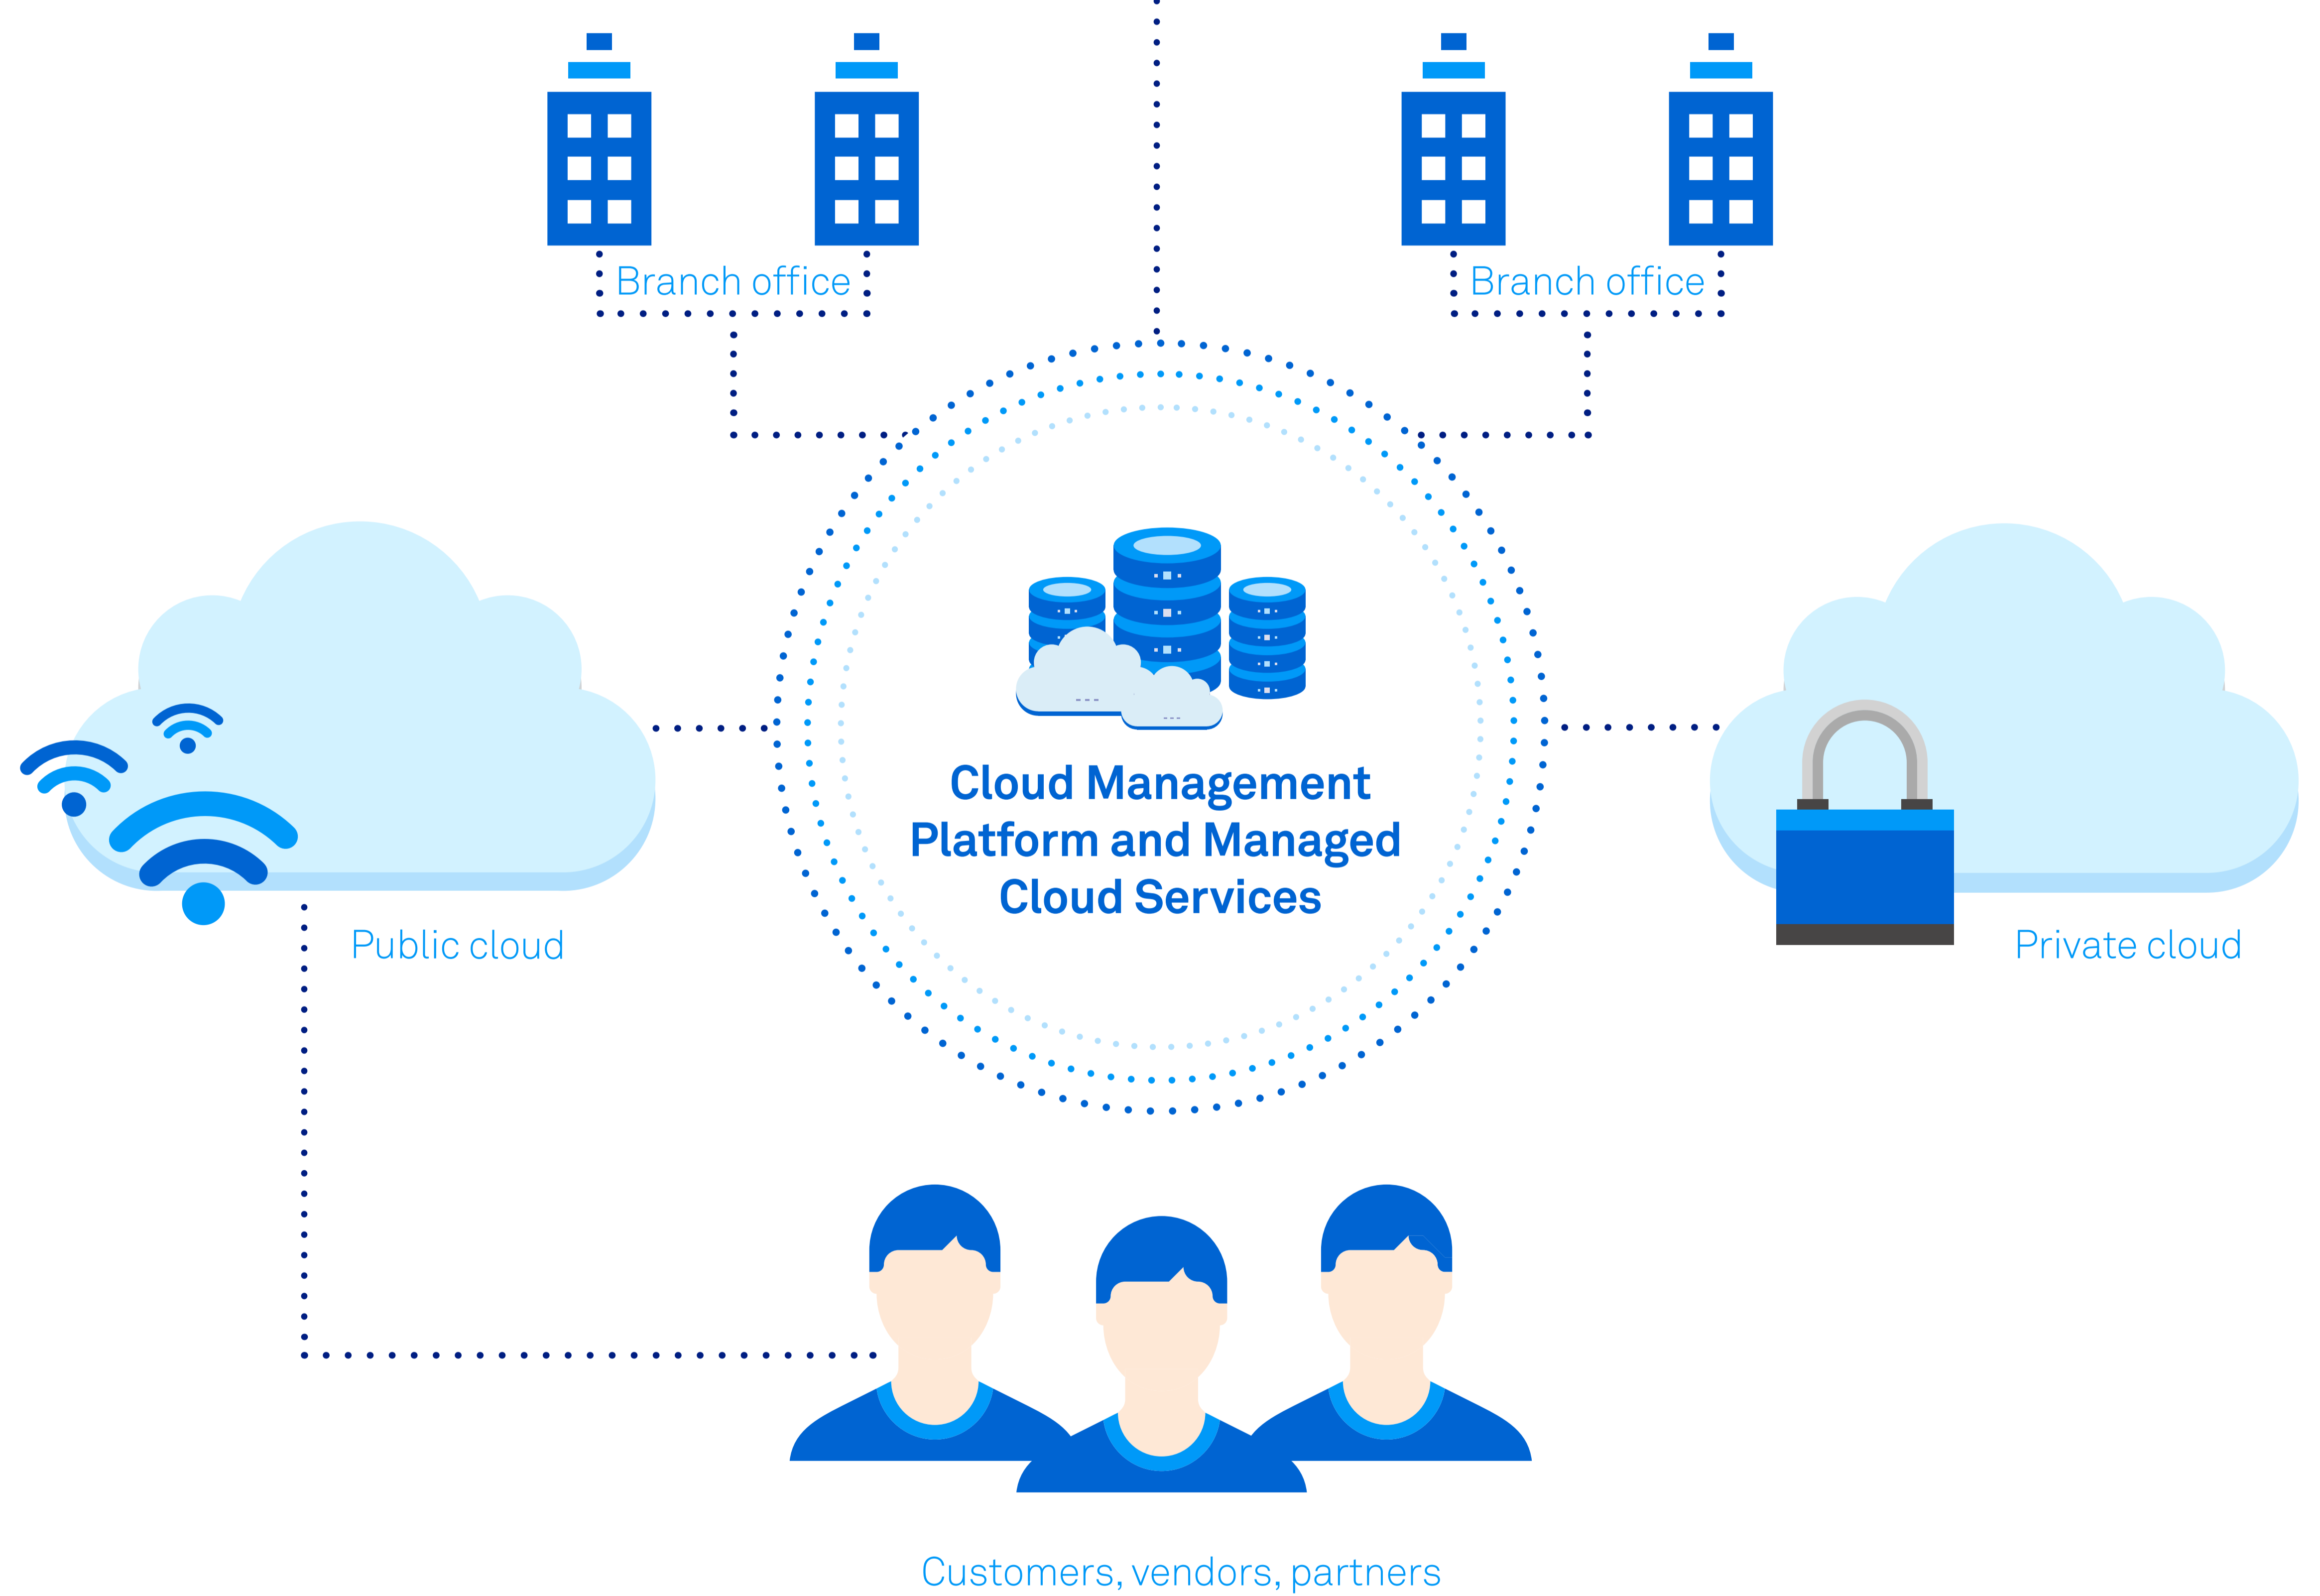

55%

of MNCs are dissatisfied with their IT's ability to support disruption and business transformation goals<sup>1</sup>

But with all these different players accessing your data, and Business Units (BU) self-provisioning shadow IT, **how do you remain compliant and secure?**

**Simple, secure**

With the **Cloud Management Platform** layer, you retain visibility and control over access and application use, helping secure your business and improve performance
