

CLOUD COLLABORATION – TIPT VIDEO

TIPT Video is a great add-on to your Telstra IP Telephony (TIPT) service. Instead of having one to one video calls, you can now quickly set up multi-party video and audio meetings on the go on any compatible device. It can help transform the way you work, whether you're in the office or on the go.

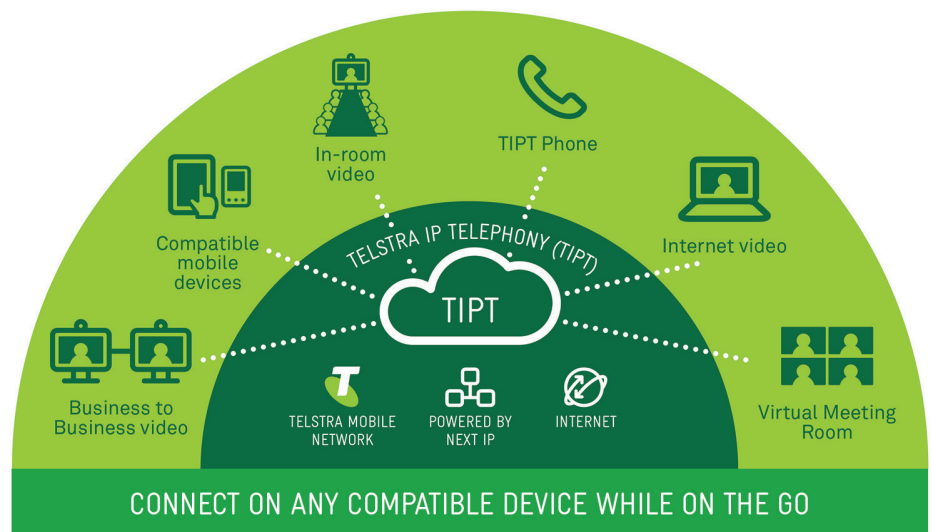

The core component of the solution is the Virtual Meeting Room (VMR) which provides a video bridge in the cloud. With the simplicity of a single dial-in number, your staff can now connect with each other and people in external organisations that use our cloud video conferencing services. It's an easy way to extend video collaboration to a wider business community of partners and customers. You can even connect over the internet, or use the telephone network for audio only participants.

Video conferencing isn't limited to in-room systems, desktop phones and computers. Take video meetings on the road with your compatible smartphone, laptop or tablet using our mobile network (data charges apply).

If you already subscribe to Telstra IP Telephony but don't have in-room video equipment, we offer cost-effective Polycom® equipment bundles to suit your business needs. If you already have compatible Polycom video equipment, you can still upgrade your codecs and camera through us, as well obtain a range of optional video accessories.

You have the flexibility to purchase the equipment up front or over a 36-month period, while the Virtual Meeting Room is provided with an affordable monthly subscription. For an extra fee, you can take advantage of additional services including site audits, installation, training, and equipment support and maintenance using our team of expert technicians.

How does it work?

Features

Virtual Meeting Room

The Virtual Meeting Room allows you to have multi-party video meetings with a variety of compatible devices using one dial-in number. Our packages include:

Packages	Participants	Single dial-in number	HD video 720p	Content sharing
Personal	Up to 8	Yes	Yes	Yes
Group	Up to 20	Yes	Yes	Yes
Conference	Up to 50	Yes	Yes	Yes

TIPT Video Bundles

We offer three complete TIPT Video bundle solutions using the latest Polycom equipment, including maintenance and support, to complement the Virtual Meeting Room.

Build Your Own Video

If you don't want one of our standard bundles, you can choose from the available codecs, camera, video accessories and Professional Services that best suit your business needs.

Bring Your Own Video

If you already have Polycom RPG or HDX model video equipment, you can still take advantage of our video capability. Subscribing to a TIPT Basic Feature Pack gives you seamless one to one video calling both internally and with other organisations that use our cloud collaboration platforms. You can extend that to multi-party video meetings by adding Virtual Meeting Room. Plus you can select from our video accessories and Professional Services.
