Welcome to Standard Call Centre for Supervisors!

This user guide provides step-by-step instructions and reference information for using TIPT Standard Thin Call Centre Web client application Release 19.

This document is intended for Standard Call Centre supervisors who use the TIPT Standard Thin Call Centre client.

Need more support?
For more information on the Standard Call Centre procedures used by Customer Administrators, go to the telstra.com/tiptresources website where you can find the following guides:

- TIPT Customer Administrator User Guide
- TIPT Standard Call Centre Agent User Guide
- TIPT Call Centre Reporting Guide.

Conventions used in this guide
The following typographical conventions are used in this guide for simplicity and readability:

- Web addresses, e-mail addresses and hyperlinks are shown in Regular, for example www.telstraenterprise.com.au.
- Button names and titles/features on your computer screen are shown in Bold.

The TIPT Premium Call Centre web based client is a call console management product for call centre agents and supervisors. This document describes the TIPT Premium Thin Call Centre clients for supervisors.

TIPT Premium Call Centre delivers the following benefits to users:

- Efficient call handling and Automatic Call Distribution (ACD) state management by Call Centre agents.
- Integration of online directories with Click-To-Dial capability.
- Real-time monitoring of agent and queue activity by Call Centre supervisors.
- Historical reporting on agent and queue activity by Call Centre supervisors.

The call centre functionality available to you depends on your call centre function (agent or supervisor), the types of queues you are staffing or monitoring, and your own services and settings.

For more information about the capabilities and services assigned to you, ask your group or enterprise administrator.

Note: Call centre functionality available in specific contexts is identified throughout the document.

Note: Call Centre is only supported with the primary telephony device that is configured for each user in TIPT Commpilot. There are significant known issues when the telephony device being used with Call Centre is configured as a shared call appearance or the primary line instead of the primary telephony device. Please talk to your CGA or Telstra for assistance.
Call Centre Supervisor

The Call Centre Supervisor client is designed to support the needs of call centre supervisors in any environment. It supports agent monitoring, queue management, real-time and historical reporting, and other features required in large call centres.

Call Centre – Supervisor Main Interface

The Call Centre interface contains the following work areas:

Call Console pane – The Call Console pane is used to view and manage your current calls.

Contacts pane – The Contacts pane contains your contact directories and provides you with real-time call and ACD state of the agents you are monitoring. Both the Call Console and Contacts panes can be moved around the screen to the agents’ desired position.

Queued Calls pane – You use the Queued Calls pane to manage queued calls.

Dashboard window – The Dashboard provides real-time summary information for up to 50 queues and allows you to monitor key performance indicators for monitored call centres and supervised agents.
Welcome to Standard Call Centre for Supervisors!

Appendix B: Keyboard Shortcuts

Report windows – You use the Report windows, accessed via the Reporting link to generate reports about the activity and performance of call centres and agents you manage.

Settings pages – You use the Settings pages, accessed via the Settings link, to configure various aspects of Call Centre.

Call Centre functions performed by supervisors are described in the following sections:

• Managing Agents.
• Managing Queued Calls.
• Dashboard.
• Generating Reports.

General Call Centre functions are also available in the following sections:

• Getting Started.
• Managing Calls.
• Managing Contacts.
• Configuring Supervisor.
Getting started

Call Centre is hosted on TIPT and you access it over the network either from your web portal or from a web browser. The sign-in procedure is the same for agents and supervisors.

**Note:** Call Centre does not support logging in as different users from the same machine at the same time.

**Sign in from web browser**

To sign in to the Call Centre client, use the same credentials that you use to connect to the web portal.

To sign in to Call Centre:

1. In your web browser, enter the URL of the Call Centre client [https://callcentre.tipt.telstra.com/callcentre](https://callcentre.tipt.telstra.com/callcentre) The Call Centre Sign-in page appears.

2. Enter your TIPT **User ID** in the format `user@domain` and your **Password**.
   
   At this point you can click on **Sign In** or continue with the advanced options.

3. If you are unsure of your user ID and password, contact your administrator.

4. Providing the append domain name has been configured in the Show Options field, you can also enter just the **user** part of your ID. The system then appends the default domain to it before authenticating you. However, if your domain is different from the default domain, you have to enter your user ID with the domain name.

5. Optionally, if your system has been configured to allow that, you can configure you domain name.

6. Check **Stay signed in** to instruct the client to automatically re-connect and sign in to the server when it detects a network connection.
7. This should generally be enabled to help mitigate intermittent internet connections. When disabled, the client signs out the user when the connection is lost.

8. To configure your domain name or the Call Centre language, click **Show options**. The area expands displaying advanced options.

9. To configure your domain, in the **Append Domain** text box, enter your domain name. When you enter your user ID without a domain, the system will append the configured domain instead of the system-wide default domain.

10. To change the language, from the **Language** drop-down list, select a new language.

11. Click **Sign In**.

12. Call Centre starts and you are signed in.

**Note:** Call Centre must be run as the only tab in a browser window.

**Launch JNLP**

Call Centre needs the Java HTTPS server to run desktop integration features, such as *Outlook Integration, Popup Notifications, LDAP Integration, Desktop Shortcut creation* and *Call Event Archival*.

**Note:** You should run Java JRE 1.6 or higher, the latest Java JRE 1.8 is recommended. You must use 32 bit JRE with a 32 bit browser and 64 bit JRE with a 64 bit browser.

As you sign in, Call Centre starts downloading a Java Network Launch Protocol (JNLP) file containing the Java HTTPS server to your machine. Perform the following steps to accept the download and install the server.
1. When a file download pop-up window appears in your browser asking you whether you want to open or save the file, select Save. Messages about downloading and verifying the application contained in the file appear, followed by a dialog box asking you whether you want to run the application.

2. Click Run. This starts the Java HTTPS server allowing Call Centre to access the desktop integration features. Desktop integration features will not be available if you click Cancel.
3. Due to security restrictions, the application may not run. If this occurs, perform the steps specified in section Security Settings for Desktop Integration Features.

4. If the browser certificate required to run the HTTPS server is not yet imported to your device, a dialog-box appears asking for your permission to install it. Follow the steps in section Certificate for Desktop Integration Features to allow the certificate to be installed. This happens only once when the certificate is not yet imported to the browser. If the certificate is already imported, a message appears informing you that it already exists, and Call Centre continues loading the plug-ins.

Note: If you refresh the browser after the local HTTPS server has started, the JNLP file is not downloaded again and the HTTPS server simply continues initializing the desktop integration features.

Sign-in restrictions

You can only have one active Call Centre session at a time. When you sign in from a second location, you are automatically signed out from the original location with the following message: “You have been signed out as you have signed in from another location.”
First time login – changing your password

The first time you log into the Supervisor client you are requested to change your password.

1. Enter your old Password (current).
2. Type a New Password
   (Your password restrictions are configured by your Customer Group Administrator).
3. Confirm your New Password.
4. Click the Change Password button.
5. The following information appears in the Logo Pane indicating that the password has been changed successfully.

Get help

Logo Pane – Help Link

Call Centre provides you with on-line access to a PDF version of this guide. To access the document, click the Help link in the top right corner of the main interface.

The TIPT Resource centre has more documentation and some videos to assist you in understanding the most used features of the Call Centre.
Sign out
To sign out of the Call Centre:

1. Click Sign Out in the top right corner of the main interface.

2. A warning message will appear if you are the only agent staffed to a call centre. Click Yes to continue sign out.

3. A message appears asking you whether you would like to save your current workspace.

4. To save your current workspace, click Yes. This allows you to retain the same interface setup at your next session.
**Getting started**

**Recommendations for first time sign in**

When you sign in to Call Centre for the first time, it is recommended that you configure the following settings:

- Configure the queues you want to join on sign-in. See Configuring Supervisor, Settings – Applications, Queue Memberships.
- Configure agents you want to monitor. See Managing Agents, Select Agents to Monitor.
- Configure queues you want to monitor. See Managing Queued Calls, Select Call Centres to Monitor.

**Change your password**

You can change your password when you are signed in to Call Centre.

To change your password:

1. Click the **Settings** link in the top right corner or the page.
2. Click the **General Tab** and then click **Change Password**.
3. Enter your old and new password in the provided text boxes and click **Change Password**.

The Reset button does not reset your password. It only clears the input boxes.

*Note:* This password is shared with your web portal and other client applications that share TIPT single logon policy. It has to meet password requirements set on TIPT.
Getting started

Change your ACD state

1. In the Logo pane, click the **ACD states** box and select your ACD state from the drop-down list.

![Logo Pane – ACD State Control](image)

2. If you selected Unavailable, and your company requires you to provide a reason for your unavailability, select an **Unavailable Code** from the drop-down list.

![Logo Pane – Unavailable Codes](image)

Enable or disable services (Call Forwarding and Do Not Disturb)

You can use the following services in Call Centre: Call Forwarding Always, and Do Not Disturb, provided that your administrator has assigned the services to you.

To enable or disable Do Not Disturb or Call Forwarding Always:

1. From the top-right corner of the main window, click **Settings**. The Settings page will display.

2. Click the **Services** tab.

3. On the Services page that appears, select the service you want to enable or disable, and check or uncheck the is **Active** box.

4. If you checked the is **Active** box for the Call Forwarding Always service, in the Forward To text box, enter the phone number to forward your call to.

5. Click **Save**.
Exploring the workspace

Based on the licence you have been assigned (Agent or Supervisor), when you sign in to Call Centre, the main page appears where you perform your call management or monitoring tasks. In addition, the main page provides links to other pages and windows of Call Centre, where you can access features such as configuration and report generation.
Many visual aspects of the Call Centre workspace are configurable. For example, you can change the size and placement of windows on the screen. You can then save your workspace and retrieve it the next time you sign in.

**Note 1:** To work in full screen mode, make sure that the main window is in focus and then click F11. F11 is a toggle button to also take you out of full screen mode.

**Note 2:** The Back, Forward, and Refresh operations of the web browser are not supported by Call Centre; and if performed, the results are inconsistent.

Most Call Centre control button and action buttons are context-based, which means that they appear only when the action they represent can be performed. A list and description of control and action buttons available in Call Centre are documented in the Control section of this document.

Call Centre interface contains the following elements based on the licence you have been assigned (Agent or Supervisor):

<table>
<thead>
<tr>
<th>Interface element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Logo Pane</td>
<td>Located at the top of the main interface, the logo pane displays global messages, information about the logged user, and links to other Call Centre interface functions.</td>
</tr>
<tr>
<td>Call Console Pane</td>
<td>The Call Console pane is where you manage your current calls. This pane contains the Calls and Conference pane.</td>
</tr>
<tr>
<td>Contacts Pane</td>
<td>The Contacts pane contains your contact directories and allows you to manage your contacts, use contacts to make calls or take actions, such as transfer to contact or queue, on existing calls.</td>
</tr>
<tr>
<td>Queued Calls Pane</td>
<td>The Queued Calls pane, available only to supervisors, allows you to manage queued calls for selected call centres that you supervise.</td>
</tr>
<tr>
<td>Reporting Windows</td>
<td>The Reporting windows, accessible from the main page Logo pane via Reporting link, provide access to Enhanced Reporting, allowing you to generate, schedule and view reports. Agents can only generate reports about themselves.</td>
</tr>
<tr>
<td>Dashboard</td>
<td>The Dashboard, accessible from the main page Logo pane via the Dashboard link, provides you with real-time summary information about the call centres and agents you supervise (up to 50).</td>
</tr>
<tr>
<td>Settings Pages</td>
<td>The Settings pages, accessible from the main page via the Settings link, allow you to configure various user-level and application settings.</td>
</tr>
<tr>
<td>Controls</td>
<td>You use controls, such as buttons and drop-down lists, to execute actions on calls, contacts, queues, and so on.</td>
</tr>
</tbody>
</table>

Exploring the workspace

This section describes the following elements of the Call Centre interface:

- Logo Pane.
- Call Console Pane.
- Contacts Pane.
- Call History.
- Controls.

For information about other interface elements, refer to the following sections:

- Managing Queued Calls.
- Generating Reports.
- Dashboard.
- Configuring Supervisor.

**logo pane**

The Call Centre main window interface contains a logo pane, which displays the Call Centre client or company logo, global messages, links to other interface elements or Call Centre functions, and information about the logged user.

**Global Message Area**

The Global Message Area, that is, the centre area of the logo pane, is used by Call Centre to display various information, warning, and error messages to the user. A message is displayed for several seconds and then disappears.
Exploring the workspace

Links to other interface elements and features
The logo pane displays links to the Report windows, Settings pages, the Dashboard (Supervisors), as well as the Help and Sign Out links.

Logged user information
Information about yourself, that is, your name, phone number, your availability to take calls, and your voice mail status, is displayed at the top right of the main interface.

Your current ACD state is displayed to the left of your name. You can change your ACD state by selecting a new state from the drop-down list.

ACD State
Information about the following services and features is provided:

- Do Not Disturb (DND) 🚫
- Call Forwarding Always (CFA) ➔
- Busy phone state 📞
- Voice Messaging 📬

The Voice Messaging icon is present only if you have outstanding voice messages.

Exploring the workspace

Call console pane
You use the Call Console pane to view and manage your current calls. For information on managing your calls, see Managing Calls.

Call Console Pane
The Call Console pane contains the following areas:
- Header Bar.
- Dialler.
- Current Call Panel.
Exploring the workspace

Header bar
The header bar contains various controls that allow you to configure your services and perform call and service-related actions.

• Auto Answer button – This allows you to enable or disable the automatic answering of calls.
• Call Waiting button – This allows you to enable or disable the Call Waiting service.
• Trace Call button – This allows you to attach a trace to the last call.
• Call History button – This allows you to access the list of your previous calls.

Dialer
The Dialler, located at the top of the Call Console pane, allows you to make ad-hoc calls.

• The Enter Number text box, where you enter the number to dial.
• Action buttons, which change depending on the context and allow you to perform operations on calls.
  For more information, see Exploring the Workspace, Call Action Buttons.
Current calls – call console

The Call Console displays your current calls, both direct calls and Call Centre calls, and allows you to take actions on them. Direct calls are calls placed from or received on your own phone number, whereas ACD calls are calls routed to you from a call centre that you are staffing.

If you are involved in a conference call, its details are displayed in a separate area of the Call Console, called the Conference Call panel.

Call Console Pane – Current Calls

The following information is displayed for each call:

- **Remote CLID** – This is the name of the remote party (if available) and the phone number in parenthesis.
- **Call State icon** – This is a visual representation of the current state of the call. For more information, see Exploring the Workspace Call States.
- **Call State name** – This is the display name of the call state the call is currently in.
- **Call duration [Held duration]** – This is the duration of the call from the time the call was received from BroadWorks and it reflects how long the call has been present in the system. If a call has been placed on hold a held timer will be displayed.

The call entry also displays action buttons for the operations that you can currently take on that call. The actions you can perform depend on the state of the call.

</tr>
</tbody>
</table>
The Contacts pane contains your contact directories and allows you to use your contacts to make or manage calls. 500 Personal Contacts can be created in CommPilot, however currently a maximum of 50 can be displayed. When you search you have access to all 500 contacts but only 50 will display in the web based client applications. For information on using contacts to manage calls, see Managing Calls. For information about organising and managing your contact directories, see Managing Contacts.

![Contacts Pane]

Contacts Pane

The Contacts pane contains the following panels:
- Search Panel.
- Enterprise Panel.
- Personal Panel.
- Agents Panel.
- Supervisor Panel.
- Speed Dial Panel.
- Queues.
- Custom Directories.
- Outlook Panel.
- Directories Panel.

The contact directories you have access to depend on your system configuration as well as the services assigned to you. For more information, contact your administrator.

When you click a contact, the entry expands and the contact's information, such as phone numbers and the action buttons for the operations that you can currently take on that contact appear.

To minimise the contact's information, click on the contact again.

You can only view the details of one contact per directory at a time. When you click another contact in the same directory, the details of the currently expanded contact are automatically hidden.

Search panel
You use the Search panel to look for specific contacts in your contacts directories. When search criteria are entered and a search performed, search results are populated into a single area. For information about performing contact searches, see Managing Contacts, Searching for Contacts.

Enterprise panel
The Enterprise panel contains the contacts in your TIPT enterprise directory. If your enterprise administrator restricted your access to the enterprise directory, you can only see the contacts from your group.

The Enterprise panel displays the contact's name and phone number.

When you click on a contact, the entry expands to provide the contact's details, such as all available phone numbers. To minimise the details, click on the contact again.

*Appendix B: Keyboard Shortcuts*

---

**Speed Dial panel**

The Speed Dial panel displays and allows you to manage your Speed Dial 8 and Speed Dial 100 contacts. For each speed dial number, Call Centre displays the speed dial code, the description, and the phone number. The description is what you entered when configuring the number.

---

**Queues panel**

The Queues panel lists the call centres you are monitoring as a supervisor and the associated Dialled Number Identification Service (DNIS) numbers. The primary purpose of this panel is to provide you with a quick way to transfer calls to queues.

Queues may be grouped based on the call centre they belong to. When they are grouped, all DNIS numbers for a call centre are listed under that call centre.

**Custom directories panel**

If your administrator has configured custom contact directories for your group, you can access them from Call Centre. A custom directory contains a subset of the contacts in your BroadWorks group or enterprise directory.

*Note:* A custom directory has the same properties as the Group/Enterprise directory.

Appendix B: Keyboard Shortcuts

Exploring the workspace

Outlook panel
The Outlook panel contains your Outlook contacts.

Directories panel
The Directories panel consolidates the contacts from the following directories: Enterprise/Group, Custom, Personal, Outlook, and Speed Dial. This panel is always visible. You can choose which directories to display in the Directories panel and you can collapse the panel, but you cannot close it.

Call History
The Call History dialog-box, accessed via the Call History button in the Calls panel allows you to view your past calls. You can place a call to a number from Call History and manage call logs.
Call action buttons

Action buttons allow you to perform actions on calls, such as answering or transferring a call, or actions that result in a call being placed.

Action buttons are context sensitive and appear on a line/entry only when you move the mouse over that entry and when the corresponding action can be performed on that entry. For example, when you select a contact in the Enterprise directory, the relevant buttons may appear on a contact, depending on the call state and the contact's configuration which enable you to perform the appropriate action.

No buttons appear on the remaining lines/entries/calls.

The following table lists the action buttons available in Call Centre.

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dial</td>
<td>This dials the number you entered in the Dialler.</td>
</tr>
<tr>
<td>Call</td>
<td>This places a call to the selected contact or to a number from Call History.</td>
</tr>
<tr>
<td>Redial</td>
<td>This redials the last dialled number.</td>
</tr>
<tr>
<td>EXT</td>
<td>This dials the contact’s extension.</td>
</tr>
<tr>
<td>Mobile</td>
<td>This dials the contact’s mobile number.</td>
</tr>
<tr>
<td>E-mail</td>
<td>This brings up a new e-mail message window with the contact’s e-mail address, allowing you to send a message to the contact.</td>
</tr>
<tr>
<td>Transfer</td>
<td>This will transfer a call to an ad hoc number entered in the Dialler.</td>
</tr>
<tr>
<td>Transfer</td>
<td>This transfers a call to a selected number or contact.</td>
</tr>
<tr>
<td>Answer</td>
<td>This answers an incoming call, answers an unanswered call for a contact, or resumes a held call.</td>
</tr>
<tr>
<td>Hold</td>
<td>This places a call on hold.</td>
</tr>
<tr>
<td>End</td>
<td>This ends a call.</td>
</tr>
<tr>
<td>Trace</td>
<td>This generates a call trace on a call.</td>
</tr>
<tr>
<td>Conference</td>
<td>This establishes a conference call or adds a call to a conference.</td>
</tr>
<tr>
<td>Camp</td>
<td>This camps a call on a busy contact.</td>
</tr>
<tr>
<td>Escalate Call</td>
<td>This escalates a call to a selected supervisor.</td>
</tr>
<tr>
<td>Emergency Call</td>
<td>This places an emergency call to a selected supervisor.</td>
</tr>
<tr>
<td>Delete Call Log</td>
<td>This deletes a call log from Call History.</td>
</tr>
<tr>
<td>ACD</td>
<td>This allows the supervisor to change a selected agent’s ACD state.</td>
</tr>
<tr>
<td>Barge</td>
<td>This allows the supervisor to barge in on an agent’s call, by establishing a Three-Way Call between the supervisor and the two parties involved in the call.</td>
</tr>
<tr>
<td>Answer</td>
<td>This answers an unanswered call for a monitored agent.</td>
</tr>
<tr>
<td>Retrieve</td>
<td>This retrieves a call from the queue to the supervisor’s device. When a call is manually retrieved via this action, the call is reported as an Incoming call rather than an ACD call in the reports.</td>
</tr>
<tr>
<td>Reorder</td>
<td>This changes a call’s position in the queue.</td>
</tr>

Controls

Call Centre controls are designed as being context sensitive, that is, most controls appear only when the action they represent can be performed. For example, when you enter a number or select a contact, a Dial button appears allowing you to place a call. The context sensitive controls that correspond to call operations such as dialling, transferring calls, or putting calls on hold are known action buttons.

The following table lists the general controls used in Call Centre and the controls displayed on the panels’ headers.

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Common controls</strong></td>
<td></td>
</tr>
<tr>
<td><img src="options" alt="Options" /></td>
<td>This is located in the upper-right corner of a pane or page. When clicked, it displays a drop-down menu of options that control the display of information in that pane/page. The available options depend on the context.</td>
</tr>
<tr>
<td><img src="expand-collapse" alt="Expand/Collapse" /></td>
<td>This shows or hides the contents of a window or panel.</td>
</tr>
<tr>

This deletes a scheduled report.  
|
Managing calls

This section describes the operations you can perform to make and manage calls.

Your current calls are displayed in the Call Console with the calls currently involved in a conference displayed in a separate panel called Conference Call.

Incoming calls may be a call directly to the Agents extension. If this is the case the call will display as a normal call.

If the incoming call is a queued call the call details will display on the logo pane and in the call console pane.

Note 1: You can only have one conference in place at a time.
Note 2: To have more than 3 parties in a conference call you will need the N-Way license assigned. N-Way is a feature of the Executive service pack.
Drag and drop call onto contact

In Call Centre, you can drag a call from the Call Console and drop it on a target contact in one of your contact directories. This provides you with a quick way to perform operations on calls that involve a contact.

As the call is dragged, a green icon is displayed. When the call is dropped onto a contact, no action is taken on the call. The target contact expands and you can select the action button for the operation you want to perform on that call.

Viewing calls

You can view your current calls and your past calls (Call History). For information about Call History, see Managing Call History.

To view your current calls:

1. In the Calls and/or Conference panel, click the Expand button.

Calls Panel Expanded
**Managing calls**

**View incoming call details**
When the Call Notification feature is enabled, a Call Notification pop-up window appears on top of the system tray when you receive an inbound call.

- For calls to your direct number or extension, the following information is displayed:
  - Calling party name.
  - Calling party number.

- For calls from a call centre, the following information is displayed:
  - Calling party name.
  - Calling party number.
  - Call centre name or DNIS name, followed by the time the call has been waiting in queue (Wait Time).
  - Number of calls in queue (Queued Calls).

**Note 1:** You have to have only one tab open in the browser running Call Centre to receive call notifications.

**Note 2:** If calls come within eight seconds of each other, the Call Notification pop-up window appears only for the first call of that series.
Receiving, answering, and ending calls

You can answer calls manually or have your phone automatically answer incoming calls.

Answer call

Note: When using the Remote Office service, the Answer button is disabled.

To answer a ringing call:
1. In the Calls panel, click Answer.

To answer an incoming call from a Call Notification pop-up window:
1. Click anywhere on the text in the pop-up window.

Auto answer calls

This feature is typically used by agents who use headsets with their phones and handle a high volume of calls. It may be enabled either by you in the client or configured in the system by your administrator.

To enable Auto Answer:
1. In the Calls panel, click Auto Answer. The button changes to indicate that Auto Answer is on.
2. When Auto Answer is enabled, your phone automatically goes off-hook when it is alerted.
   This applies to both inbound and Click-To-Dial calls.
3. The Auto Answer feature may be enabled manually in the Call Centre client or by the administrator on CommPilot.

Note: If this feature is enabled by your administrator, you must NOT enable the client-based Auto Answer using the Auto Answer button.

End call

To end a call:
1. Expand the Calls panel.
2. Move the mouse over the call and click End.

Making outbound calls

You can make calls to an ad-hoc number, to a contact from any of your Contacts directories, or to a number from Call History.

Dial ad-hoc number

You use the Dialler, located at the top of the Call Console pane, to place a call to an ad-hoc number.

Managing calls

To dial an ad-hoc number:
1. In the Dialler, enter the phone number, press Enter or click Dial.
   The specified phone number is dialled and the call appears in the Calls panel.

Re-dial number
Call Centre keeps up to ten most recently dialled numbers, which you can redial using the Dialler.

To redial the last number you called:
1. In the Dialler, click Redial. The most recently dialled number is called.

To redial one of the recently dialled numbers:
1. In the Dialler, place the cursor in the text box and start entering a number.
   A list of recently called numbers that start with the entered digits appears.

   Dialer – Redialing Number

   • Select the number to dial and click Dial.

Dial contact
You can use any directory in the Contacts pane to dial a contact.

To dial a contact:
1. In the Contacts pane, expand the directory from which you want to dial a contact.
2. Click the target Contact to expand it, click Call.
3. Alternatively, to dial the contact’s extension, click Extension.
   OR
   To dial the contact’s mobile number, click Mobile.

   The contacts mobile number must be configured in CommPilot in the User’s Profile for this action button to display.
4. The phone number is dialled and the call appears in the Calls panel.

Dial from search
You use the Search panel in the Contacts pane to search for contacts in your Contacts directories.

To dial a number from search:
1. Enter the required information into the Search field.
2. Press Enter.
3. Expand the Search Results panel for the directory from which you want to select a contact.
Managing calls

Welcome to Standard Call Centre for Supervisors!

Dashboard
Generating reports
Configuring supervisor
Configure web browser
Appendix A: Glossary and Definitions
Appendix B: Keyboard Shortcuts

4. Click the target contact to expand it and then click Call.

Dial from history
You can dial any number that is available in Call History - Missed, Received or Placed calls. To dial from Call History.

1. In the Call Console pane, click Call History.

2. From the Show drop-down list, select Missed Calls, Received Calls, or Placed Calls.

3. Click the call log from which you want to dial and then click the Call button.
Placing calls on hold, resuming calls
You can only put an active call on hold

**Note:** When using the Remote Office service, the Hold/Resume buttons are disabled.

Place call on hold
To place a call on hold
1. Click **Hold** for the target call.

Resume held call
To resume a held call:
1. Click **Answer** for the target call.

Transferring calls
There are a number of ways in which you can transfer a call - blind transfer, transfer with consultation, and transfer to queue.

**Blind transfer**
Use this method to transfer a call to another number without providing an introduction to the destination party.

To blind transfer a call to an ad-hoc number:
1. From the **Call Console** panel, select the call to transfer.
2. In the **Dialler**, enter the destination number and click **Transfer**.
   The call is transferred and removed from the **Call Console** panel.

To blind transfer a call to a contact:
1. From the **Call Console** panel, select the call to transfer.
2. In the **Contacts** pane, expand the panel from which you want to select a contact.
3. Click the destination contact and click **Transfer** for that contact.
   The call is transferred and removed from the **Call Console** panel.

**Transfer with consultation**
Use this method to transfer a call with an introduction to the destination party. To transfer a call with consultation
1. While the call is still active, make a call to the person to whom you want to transfer the call (the original call will be automatically placed on hold).
2. Wait until the called party accepts your call.
3. When ready to transfer, from the **Call Console** panel, select one of the two calls by clicking on it.
4. Move the mouse over the non-selected call and click **Transfer**.
5. The calls are connected and removed from the **Call Console** panel.
Managing calls

Transfer to queue
You can transfer a call back to a queue. A transferred call is placed at the bottom of the queue.
To transfer a call to a queue.
1. From the Call Console panel, select the call to transfer.
2. In the Contacts pane, expand the Queues panel.
3. Click the destination queue and click Transfer for that queue.
4. The call is transferred to the selected queue and removed from the Call Console.
5. Alternatively, drag the call onto the target queue and click Transfer for that queue.

Managing conference calls
You manage conferences in the Call Console pane. You use the Calls panel to establish a conference and add participants to it, you use the Conference panel to manage or end an active conference call. You can only have one active conference at a time.

Start three-way conference
To start a conference call, you need to have at least two current calls. The calls can be received or made by you. If required, make calls using any of the methods described in Managing Calls, Making Outbound Calls.
To start a conference:
1. Expand the Calls panel and select a call.
2. Move the mouse over a non-selected call and click Conference. A three-way conference is established and the connected calls appear in the Conference panel.

Conference Panel – Conference Call

Add participant to conference

Note: To add participants to a conference, you need to have the N-Way Calling service assigned.

To add a participant to a conference:
1. If the call you want to add to the conference is not yet established, place the call.
2. In the Call Console panel, move the mouse over the call and click Conference. The call is added to the conference.

Hold conference
To put an active conference on hold.
1. In the Conference Call panel, click Hold Conference. This allows other conference participants to continue their conversation.

Resume conference
To resume a conference call that you previously put on hold.
1. In the Conference Call panel, click Resume Conference. All the calls in the conference become active.

Hold participant
To put a specific conference participant on hold.
1. Expand the Conference Call panel.
2. Move the mouse over the target call and click Hold.

Take participant off hold
To resume a participant’s held call.
1. Expand the Conference Call panel.
2. Move the mouse over the target call and click Resume.
Managing calls

Leave conference
To leave the conference:

1. In the Conference Call panel, click Leave Conference.

The other parties continue their conversation.

Note: This function is only available for three-way conferences.

End participant
To end a selected call in a conference:

1. Expand the Conference Call panel.
2. Move the mouse over the call and click End.

End conference
To end the conference:

1. In the Conference Call panel, click End Conference.

This releases all the calls that participated in the conference.

Generating call trace
Call Centre allows you to generate a trace on active, held, released, or missed calls.

Note: Tracing calls needs to be set up with the relevant Telstra division prior to this feature being configured in CommPilot by your Customer Group Administrator (CGA). You must be assigned the Customer Originated Trace service to use this capability.

CGA’s cannot view the logs of a traced call. Telstra will provide the information to your CGA.

A call trace contains the following information:

- The phone number of the user who initiated the trace.
- The date and time the call was received.
- The identity (name and number) of the caller, if available.
- Issuing more than one call trace request has no effect.

Generating call trace for selected call
To generate a trace for a selected call:

1. Expand the Calls panel.
2. Move the mouse over the target call and click Trace for that call.

Generating call trace for last released call
You can generate a trace for the most recently released or missed call.

To generate a trace for the last released or missed call:

1. In the Calls panel, click Trace.
A Supervisor uses the Agents panel to view the agents that they are supervising and to perform actions on them. A supervisor can also monitor the call and ACD state of selected agents.

Agents Panel
Select agents to monitor

Call Centre allows you to monitor the call and ACD state of selected agents, monitoring agents is not automatic when you log in as a supervisor. To monitor the state of an agent, you must select the agent/s.

To select agents to monitor:

1. In the Agents panel, click Edit.

2. Select the check box next to each agent to monitor. If an agent is staffing multiple call centres, selecting that agent for monitoring in one call centre selects them for monitoring under all call centres they are staffing.

3. Click Save.

4. The selected agents have their call and ACD state displayed. The state of agents who are not monitored appears as unknown (greyed out).

5. The list is saved and is available during subsequent sessions.
Agents phone and ACD states

Monitored agents have their phone and ACD state displayed. A single icon, to the left of the agent’s name, represents the agent’s combined phone and ACD state, which indicates the agent’s ability to take calls. In addition, the agent’s ACD state is also displayed in text below their name. If the agent’s ACD state is set to Unavailable, the unavailable code is also displayed (if applicable).

The state of agents who are not monitored appears as unknown (greyed out).

<table>

</tr>
</tbody>
</table>
View agent’s details

Click on an agent to expand the entry, view all joined queues and all the agent’s current calls. To minimise the agent’s details, click on the agent again.

For each call, the following information is displayed:

• Call number.
• Calling name (if available), calling number (and for direct calls, extension); for example, “Joe Smith +6139202200”.
• Call length in the following format: “MM:SS” (or “HH:MM:SS” if the call lasts longer than an hour); for example, “10:22”.

Agents Panel – Expanded Contact

The queues the agent is a member is listed at the bottom of the Agents details. The information displayed is:

• Call Centre Name.
• Join Status – joined or unjoined.
• Skill level - if the call centre uses Skills based routing the skill level is displayed, otherwise the skill level will be N/A.
Managing agents

Change agent ACD state
You can force an ACD state change for an agent. This action can only be performed on monitored agents. To change an agent’s ACD state:

1. In the Agents panel, click the target agent and click the ACD button.

2. From the drop-down list, select the new state.

3. If you selected Unavailable, you may have to select the reason for their unavailability.

Barge in on agent’s call
Supervisor Barge-In allows you to barge in on an agent’s call. This is useful when you want to enter an already established call between two other people. You can only barge in on agents that you selected for phone and ACD state monitoring.

Note: This functionality is only available if you have been assigned the Directed Call Pickup with Barge-in service.

To barge in on an agent’s call:

1. In the Contacts pane, expand the Agents panel and select an agent. The agent must have exactly one active call.
2. Double click the agent, click Barge In.
3. A three-way conference is established.
Managing agents

Pick up agents ringing call

Call Pickup allows you to pick up an unanswered call on behalf of an agent. This is useful when the agent is away or busy.

**Note 1:** This functionality is only available if your group has been assigned the Call Pickup service.

**Note 2:** A call that is retrieved using Call Pickup is treated in the Call Centre reports as a direct inbound call to the retrieving party and not as an ACD call, because it was not answered by the agent selected using the ACD process.

**Note 3:** Supervisor Call Pickup is only supported if the agent and supervisor are in the same group.

To pick up an unanswered call for an agent:

1. In the Agents panel, select an agent whose phone is ringing.
2. Click on the Agent and click **Answer**.
3. You are now answering the call, and the call appears in the Call Console panel.
The Standard Call Centre allows you to manage queued calls in real time. You use the Queued Calls pane to manage queued calls under you are supervising or monitoring.

The following section describes the operations that can be performed in the Queued Calls pane:

• Select Call Centres to Monitor.
• Show or Hide Call Centre.
• View Queued Calls.
• Group Queued Calls.
• Order Queued Calls.
• Retrieve Call from a Queue.
• Transfer Call to another Queue.
• Transfer Call to Top of Queue.
• Transfer Call from Queue to Agent.
• Transfer Call to Ad-hoc Number.
• Change Position of Call in Queue.

Queued calls pane

You use the Queued Calls pane to manage queued calls.

The Queued Calls pane displays the monitored call centres and lists the calls queued in each call centre. Each call centre is displayed in a separate panel. The panel's header provides the following information and controls:

• Call centre name – The name of the call centre.
• Call centre number – The primary phone number of the call centre.
Managing queued calls

The information below is for Premium Call Centres. As a Standard Call Centre Supervisor you may still view a Premium Call Centre if you have been assigned as a supervisor.

- **Service Mode button** – This identifies the service mode of the premium call centre. Clicking the button launches the Edit Queued Calls Favorites dialog box and allows you to activate Night Service Override or Forced Forward. The call centre can be in one of the following service modes:
  - **Night Service** – The call centre is processing calls according to the Night Service schedule and policy.
  - **Night Service Override** – The call centre has been manually forced to follow the Night Service policy.

**Note:** The Night Service or Night Service Override mode displays only if the Night Service policy is triggered. It is triggered either by the Night Service schedule or by a manual override. Different treatments such as Perform busy treatment or Transfer to phone number/SIP-URI can be applied to incoming calls while in Night Service for Forced Forward and these are configured by your Customer Administrator.

Setting the action to None acts as if the Night Service policy was not triggered, and the Night Service/Night Service Override mode is not displayed.

- **Holiday Service** – The call centre is processing calls according to the Holiday Service schedule and policy.

**Note:** The Holiday Service mode displays only if the Holiday Service policy is triggered and if the action to apply to incoming calls is set by your Customer Administrator to either Perform busy treatment or Transfer to phone number/SIP-URI.

Setting the action to None acts as if the Holiday Service policy was not triggered, and the Holiday Service mode is not displayed.

- **Force Forwarding** – All calls to this call centre are forwarded to a specified destination.
- **Normal** – Call centre is in normal mode of operation; none of the above modes is enabled.
- **Message Waiting icon** – This icon is displayed if there are one or more outstanding voice messages left in the call centre’s voice mailbox. This icon performs the role of a message waiting indicator for the call centre.
- **Ratio of queued calls to queue length** – The number of calls in queue against the queue length is displayed.

When you expand the panel for a call centre, the list of calls queued in that call centre appears.

By default, calls are listed according to their position in the queue, with the oldest call first. They can be grouped, for more information, see Managing Queued Calls, group Queued Calls.
Managing queued calls

The following information is provided for each call:

- **Call Status icon** – A graphic representation of the state of the queued call:
  - Waiting – The call is queued, waiting to be answered.
  - Reordered – The position of the call in the queue has been changed.
  - Bounced – The call has been bounced.
- **Call ID display** – The destination name (or number, if the name is not available), that is the name/number of the call centre (or DNIS, if applicable) that was called.
- **Call time** – The total call time, including the time in the current queue (in parentheses).

Click on a call expands the call to show additional data:

- **Position** – The position of the call in the queue.
- **Name** (if available) and phone number of the calling party.

When you move the mouse over a queued call, the action buttons for actions that can be performed on the call appear.

Select call centres to monitor

You can select up to five call centres to monitor in the *Queued Calls* pane.

To select call centres to monitor:

1. In the *Queued Calls* pane, click **Options**.
2. Select the **Edit Queue Favorite Dialogue**.
Managing queued calls

3. The **Edit Queue Favorites** dialog box will display

![Edit Queue Favorites Dialog Box]

4. Select the Monitor check boxes in the rows of the call centres to monitor.
5. Click **Save**.

**Show or hide call centre panels**

You can show or hide call centre panels for monitored queues.

To show/hide call centre panels.

1. In the Queued Calls pane, click **Options**.
2. Select **View** and then select or unselect the names of the call centres.
3. To show or hide all call centres, select or deselect All.

![Queued Calls – Options – View]
Managing queued calls

View queued calls
You can selectively show or hide calls in the monitored call centres. To view queued calls for a call centre:

1. Click the Expand button for that call centre To view call details of a selected call:
2. Click on that call.

Group queued calls
You can group queued calls by their priority. To group or ungroup queued calls:

1. In the Queued Calls pane, click Options.
2. From the drop-down list, select Group, and then select or deselect Group by Priority. This action applies to all monitored call centres.
3. To ungroup calls, unselect the Group by Priority option

Order queued calls
Queued calls can be ordered according to their total waiting time or their waiting time in the current priority.
To order queued calls:

1. In the Queued Calls pane, click Options.
2. Select Sort and then the ordering option you want. This operation applies to all monitored call centres.
Managing queued calls

Retrieve call from a queue
To retrieve a call from a queue.
1. Click the call in the Queued Calls pane and click Retrieve for that call.
2. Once you retrieve a call, the call appears in the Call Console and you treat it as any other call.
   For example, you can transfer it to an ad hoc number or to another queue.

Transfer call to another queue
To transfer a queued call to another queue.
1. In the Queued Calls pane, select the call to transfer.
2. In the Contacts pane, expand the Queues panel.
3. Click the target queue and click Transfer.
4. The call is transferred and removed from the queue.

Transfer call from queue to agent
To transfer a call from a queue to an agent.
1. In the Queued Calls pane, select the call to transfer.
2. In the Contacts pane, expand the Agents panel.
3. Click the target agent and click Transfer for that agent.
4. The call is transferred and removed from the queue.

Transfer call to ad-hoc number
To transfer a call to an ad-hoc number.
1. In the Queued Calls pane, select the queued call.
   
<table>
<thead>
<tr>
<th>QUEUED CALLS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sales 033959999</td>
</tr>
<tr>
<td>Tim David (033950078)</td>
</tr>
<tr>
<td>Parker (93850620)</td>
</tr>
<tr>
<td>Amy Watson (033950521)</td>
</tr>
</tbody>
</table>

2. In the Dialler, enter the destination number and click Transfer.

3. The call is transferred and removed from the queue.
Managing queued calls

Change position of call in queue
To change a call's position in a queue:
1. In the Queued Calls pane, click the target call to expand it.
2. Click Reorder and select the new position in the queue from the list that appears.
3. The call is placed in the new position.

Note: You cannot place a call ahead of a bounced call.

Transfer call to top of queue
If your administrator has configured the call centre with the Transfer to Top feature, follow this procedure to transfer the call to the top of the queue.
There need to be at least two calls in the target queue.
1. In the Queued Calls pane, click the target call to expand it.
2. Click Reorder and select Send to Front from the list that appears.
Managing call history

Call Centre collects call logs for your placed, received, and missed calls. You can view, organise, and delete call logs using the Call History feature.

You can call any number available in Call History.

**View call history**

You can view your Placed, Received, and Missed calls.

To view your call history.

1. In the Call Console panel, click **Call History**.

   By default the calls are grouped into Placed, Received, and Missed calls.
2. To show calls in a specific group, select that group from the Show drop-down list.

Missed Calls - Call History Dialog Box
E-mailing contacts

Call Centre allows you to send an e-mail message to a contact that has e-mail configured in their User Profile in CommPilot. You must also have messaging enabled within Call Centre settings. For information, see Supervisor Settings, Settings – Messaging.

The E-mail button appears when you select a contact that has e-mail configured.

Send e-mail message to a contact

To send an e-mail message to a contact.

1. In the Enterprise directory move the mouse over a contact that has e-mail address.
2. Click E-mail. This brings up a new e-mail window for the configured messaging service.
3. Write your message and click Send.
Welcome to Standard Call Centre for Supervisors!

Managing contacts

Use the Contacts pane to perform call and monitoring operations on your contacts and to manage your contacts directories.

![Contacts Pane](image)

Contacts Pane
Call Centre provides access to the following contact directories:

<table>
<thead>
<tr>
<th>Interface element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enterprise</td>
<td>The Enterprise directory contains the contacts in your CommPilot enterprise directory.</td>
</tr>
<tr>
<td>Personal</td>
<td>The Personal directory contains all contacts in your Personal Phone List on CommPilot.</td>
</tr>
<tr>
<td>Agents (Supervisors)</td>
<td>The Agents directory, available only to supervisors, contains the list of agents you supervise and allows you to manage them and view their phone and ACD state.</td>
</tr>
<tr>
<td>Speed Dial</td>
<td>The Speed Dial directory contains the numbers configured for you or by you for your Speed Dial services (Speed Dial 8 and/or Speed Dial 100).</td>
</tr>
<tr>
<td>Queues</td>
<td>The Queues directory lists the call centres and associated DNIS numbers for the call centres you are either supervising or staffing. It allows you to quickly transfer calls to queues.</td>
</tr>
</tbody>
</table>

Access to certain directories such as Outlook and LDAP depends on your permissions and the system setup.

For information about the operations you perform to manage your contact directories, see the following sections:

- Viewing Contacts.
- Organising Contacts.
- Searching for Contacts.
- Managing Speed Dials.
- Managing Personal Contacts.

**Note:** Personal contact can only be modified if the name, when being entered accidently included a '/ ' or the number entered is less than two digits.
**Viewing contacts**

Call Centre allows you to select directories to display in the Contacts pane, show or hide directory contents, and select display order of information in certain directories.

**Show or hide directories**

You can decide which of the directories that you are allowed to access appear in the Contacts pane.

To display or hide a directory:

1. In the Contacts pane, click **Options**.
2. Select **View, Directories**, and then select or unselect the directory to display/hide. To display all directories, select **All**.
3. To hide a directory, you can also click the **Close** button for that directory.

**Show or hide directory content**

By default, your directories are collapsed, with only the title bar visible. You can selectively expand the directories that you want to use.

To show or hide contacts in a directory:

1. In the Contacts pane, click the **Show/Hide** button for that directory.
Show or hide contact details
You can view the details of a contact in the directories. To view contact details:

1. In the Enterprise directory, click on the contact. The entry expands displaying the contact’s phone numbers configured in that directory.

2. To minimise the agent’s details, press CTRL and click on the agent.

Select display order
Contacts in the Group, Agents, and Supervisors directories can be displayed either by their first name or last name. Your selection applies to all those directories. You cannot specify the display order for each directory individually.

To specify the contacts’ display order:

1. In the Contacts pane, click the Options button.

2. Select View, then Display Name, and then the order by which you want to display contacts: Last Name, First Name or First Name, Last Name.
Organising contacts

Sort contacts

You can sort contacts in the following directories: Enterprise, Queues, and Agents.

To order contacts in a directory:

1. In the Contacts pane, click Options.
2. Select Sort, then the name of the directory for which you want to sort contacts, and then the sorting option.

Searching for contacts

Call Centre provides you with a search function that allows you to search for specific contacts in your directories.

You use the Search panel in the Contacts pane to look for contacts.
Perform contact search
To search for contacts:

1. In the Search text box enter the text you want to search for and press ENTER. You can enter partial information, such as part of a name or phone number.
2. For example, if you do not remember whether Mary’s last name is spelled “Shelley” or “Shelly”, you can enter “Shell”, and either name is returned.
3. The search is not case-sensitive.
4. The text you enter is matched against all attributes of every entry in the selected directories.
5. Search results are displayed into a single area.

6. To view the search results for a specific directory, click the Search Results panel for that directory.
7. Depending on the Call Centre setup, search returns either all the contacts (in the selected directories) that contain the entered keyword or all the contacts that start with the entered keyword.
8. In the first case (Contains), entering “Ann” and selecting “First Name” from the Keyword Search Filter drop-down list returns all contacts with the first name “Ann”, but it also returns all contacts with first names such as “Anne”, “Marianne”, “Marie Ann”, “Ann Marie”; and so on.
9. In the second case (Starts With), entering “Ann” and selecting “First Name” returns all contact with the first names such as “Ann”, “Anne”, and “Ann Marie”, but not “Marianne” or “Mary Ann”.
10. To clear the search results, click Reset.

Note 1: Directories are searched in the following order: Supervisors, Agents, Enterprise. Duplicate search results in TIPT directories are not displayed; the first match for a given contact is displayed.
Duplicate search results in other directories are displayed.

Note 2: Contact entries displayed in search results follow the same rules as if that entry was accessed in their own directory. This allows you to perform any operations you need directly from the search results.
Managing personal contacts

You can add or remove personal contacts via CommPilot or in Call Centre, and the updates appear in both places. The updates you make via CommPilot appear only in Call Centre at the next sign in.

To update personal contacts using the client, you can perform the following operations:

- Add Personal Contact.
- Modify Personal Contact.
- Delete Personal Contact.

Add personal contact

To add a personal contact:

1. In the Personal panel, click Edit.
2. Click Add. A new line is added below the existing entries, allowing you to define a new entry.
3. In the Name text box, enter the contact's name or description as you want it to appear in the contacts list.
4. In the Number text box, enter the phone number of the contact.
5. Close the dialogue box to save the entry or Click Add to Save the current and add another new entry.
Welcome to Standard Call Centre for Supervisors!

**Modifying contacts**

Modifying a personal contact:

1. In the Personal panel, click **Edit**.
2. **Double-click** the entry to modify. The entry becomes modifiable.
3. Modify information as required.
4. Close the dialogue box to save the changes.

**Note:** Personal contact can only be modified if the name, when being entered, accidentally included a '/' or the number entered is less than two digits.
Delete personal contact
To delete a speed dial entry:
1. In the Personal panel, click Edit.
2. Select the entry to delete and click Delete.
3. Click X to save the action and close the dialogue box.

Managing speed dial numbers
You can add or remove Speed Dial numbers via CommPilot or in Call Centre, and the updates appear in both places. The updates that you make via CommPilot appear only in Call Centre at the next sign in.

To update speed dial entries using the client, you can perform the following operations:
• Add Speed Dial Entry.
• Modify Speed Dial Entry.
• Delete Speed Dial Entry.
Add speed dial entry
To add a speed dial entry:
1. In the Speed Dial panel, click Edit.
2. Click Add.
   A new line is added below the existing entries, allowing you to define a new entry.
3. From the code drop down list, select a speed dial code.
4. In the phone Number text box, enter the phone number to assign to the code.
5. In the description text box, enter a description that will allow you to identify the entry.
6. Close the dialogue box to save the entry.

Modify speed dial entry
To modify a speed dial entry:
1. In the Speed Dial panel, click Edit.
2. Double-click the entry to modify.
   The entry becomes modifiable.
Managing contacts

Edit Speed Dials Dialog Box – Modifying Entry

3. Modify information as required.
4. Press Enter to save the information just modified.
5. Close the dialogue box.

Delete speed dial entry

To delete a speed dial entry:

1. In the Speed Dial panel, click Edit.
2. Select the entry to delete and click Delete.

Edit Speed Dials Dialog Box – Deleting Entry

3. Close the dialogue box to save the changes.
Dashboard

Call Centre provides you with real-time information about supervised agents and queues. This information is displayed in the Dashboard.

Display dashboard

To access the Dashboard:

1. Click the Dashboard link at the top right of the main interface window. The Dashboard is launched in a separate window and can be open at the same time as other Call Centre windows.
Welcome to Standard Call Centre for Supervisors!

Introduction

Exploring the workspace
Managing calls
Managing agents
Managing queued calls
Managing call history
E-mailing contacts
Managing contacts
Dashboard
Generating reports
Configuring supervisor
Configure web browser
Appendix A: Glossary and Definitions
Appendix B: Keyboard Shortcuts

Dashboard

The Dashboard is divided into two parts, with queue information in the top half and agent information in the bottom half. The information is updated in real time.

By default, information about agents is hidden.

To view agents staffing a call centre:
1. Check the Show Agents check box in the row for that call centre.

Queue information

The Dashboard displays each call centre queue on a separate line and provides the following information about each queue:

• **Name** – This is the name of the call centre to which the queue belongs.

• **Status** – This displays the status of the call centre, which can be one of the following:
  - **Night Service** – The call centre is processing calls according to the Night Service schedule and policy.
  - **Night Service Override** – The call centre has been manually forced to follow the Night Service policy.
  - **Holiday Service** – The call centre is processing calls according to the Holiday Service schedule and policy.
  - **Forced Forward** – All calls to this call centre are forwarded to a specified destination.
  - **Normal** (which indicates none of the above).

• **Calls in Queue** – This is the number of queued calls expressed as a ratio of the total queue capacity for that call centre. For example, “6/10” means that there are six calls in the queue, which can queue a maximum of ten calls.

• **Longest Waiting Call** – The waiting time of the call that has been in the queue the longest.

• **EWT (Expected Waiting Time)** – This is the expected waiting time of calls in the queue.

• **AHT (Average Handle Time)** – This is the average handling time for calls in the queue.

• **ASA (Average Speed of Answer)** – This is the average amount of time a caller spends in the queue before the call is offered to an agent.

• **Staffed (Agents)** – This is the number of agents managed by you that are in **Sign-In, Available, Unavailable, or Wrap-Up ACD** state, as a ratio of all agents managed by you for this call centre.

Note: The Night Service or Night Service Override status displays only if the Night Service policy is triggered, either by the Night Service schedule or by a manual override, and if the action to apply to incoming calls is set to either Perform busy treatment or Transfer to phone number/SIP-URI. Setting the action to None acts as if the Night Service policy was not triggered, and the Night Service/Night Service Override status is not displayed in Call Centre.

Note: The Holiday Service status displays only if the Holiday Service policy is triggered and if the action to apply to incoming calls is set by a BroadWorks administrator to either Perform busy treatment or Transfer to phone number / SIP-URI. Setting the action to None acts as if the Holiday Service policy was not triggered, and the Holiday Service status is not displayed in Call Centre.

Dashboard

- **Idle (Agents)** – This is the number of agents who are in the Available ACD state but presently not on a call.
- **Unavailable** – This is the number of agents who are signed in to the call centre but not available to take calls.
- **Show Agents** – When this check box is selected, the agents who are joined in the call centre are displayed in the Agents area of the Dashboard.

Agent information

The Dashboard displays information about the agents for the selected queues. You select the queues for which you want to view agents’ information by checking the Show Agents box on the lines for the queues in the Queues area of the Dashboard. The following information is provided for each displayed agent:

- **Name** – The agent’s name
- **Queues (total)** – This is the total number of queues the agent is assigned to. This number is a link, which when clicked opens a dialog box that lists the agent’s queues.
- **Sign-in Time** – This is the agent’s most recent sign-in time.
- **Sign-in Duration** – This is the amount of time that the agent has been signed in.
- **Call State (Time)** – This is the call state and time on the current call. The call state can be “Idle”, “Ringing”, or “On a call”. If an agent is in multiple calls, the call time reflects the time of the longest running call. When a call is released, then the call time reflects the time on the remaining calls.
- **Agent State (Time)** – The agent ACD state and time. If an agent is unavailable, the unavailable code is shown.
- **%Available** – This is the time that the agent was available to take calls shown as a percentage of the duration of the current sign in.
- **Avg Busy In** – This is the average time spent by the agent on an incoming ACD call.
- **Avg Busy Out** – This is the average time spent by the agent on an outgoing ACD call.
- **Avg Wrap-Up** – This is the average time spent by the agent in a post-call wrap-up.

The Dashboard is designed to be used together with the Queued Calls pane and the Agents panel in the Contacts pane. The Dashboard provides you with a real-time view of agents and queues, while the Agents panel and Queued Calls pane allow you to take actions on monitored agents and ACD calls.
Select information to display

You can modify the Queue and Agent information that displays in the Dashboard.

To select information to display,

1. **Right-click** on the header row (displays row heading) of the queued calls or agents table.
2. From the menu that appears, select *Columns*.
3. From the list of available columns, uncheck the columns you want to hide and check the columns you want visible.

4. Click anywhere in the Dashboard outside the menu to save and view your selections.
Thresholds

The Dashboard for supervisors and the simplified agent Dashboard show the visual indication using background colour coding (Yellow and Red) when the configured threshold is reached or exceeded according to the configured severity level for the corresponding type of threshold.

Thresholds are configured by your CGA in the CommPilot Portal.

The following table shows the visual indication for threshold severity.

<table>
<thead>
<tr>
<th>Severity</th>
<th>Value</th>
<th>Background colour</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>0</td>
<td>Default (No Change)</td>
</tr>
<tr>
<td>Yellow</td>
<td>1</td>
<td>Yellow</td>
</tr>
<tr>
<td>Red</td>
<td>2</td>
<td>Red</td>
</tr>
</tbody>
</table>

The following figure shows the visual colour coding indicators in the supervisor Dashboard where the severity level of the attributes has reached or exceeds the configured threshold value according to the data set mentioned in the table that follows it.

<table>
<thead>
<tr>
<th>Queue</th>
<th>Threshold type</th>
<th>Threshold severity</th>
<th>Threshold colour</th>
</tr>
</thead>
<tbody>
<tr>
<td>Queue (Finance)</td>
<td>Longest Waiting Call</td>
<td>2</td>
<td>RED</td>
</tr>
<tr>
<td>Queue (Finance)</td>
<td>Average Handling Time</td>
<td>1</td>
<td>YELLOW</td>
</tr>
<tr>
<td>Agent (Manu, Malhotra)</td>
<td>Current Call State On-Call Time</td>
<td>1</td>
<td>YELLOW</td>
</tr>
<tr>
<td>Agent (Manu, Malhotra)</td>
<td>Average Busy In</td>
<td>2</td>
<td>RED</td>
</tr>
<tr>
<td>Agent (McKenzie, Daniel)</td>
<td>Current Agent State Unavailable Time</td>
<td>1</td>
<td>YELLOW</td>
</tr>
</tbody>
</table>
Generating reports

The Standard Call Centre provides reporting functions to agents and supervisors. Agents can only generate reports about their own activity whereas supervisors have access to reports on activity and performance of agents and call centres under their supervision.

The Standard Call Centre supports Enhanced Reporting.

**Enhanced reports**

The Enhanced Reporting feature enhances the reporting capabilities of the TIPT Standard Call Centre solution. Enhanced Reporting allows you to run reports and schedule reports to run in the future using pre-defined templates. Reports can be of type Agent or Call Centre. Report templates cannot be customised or altered.

The report templates available to you depend on how your administrator has configured your system.

You use the Reporting link at the top of the main interface to access pages used to generate and schedule Enhanced reports.

Reporting Link on Logo Pane

This section provides an example of an Enhanced report. For the list of canned report templates available on TIPT for report generation as part of Enhanced Reporting, see the TIPT Call Centre Reporting Guide.
Run enhanced report

To run a report:

1. Click the Reporting link at the top right of the main window.
2. Select a report template from the drop-down list.
   The page displays the input parameters for the report.

2. Select a report template from the drop-down list.
   The page displays the input parameters for the report.

3. Fill in the required information. The input that you need to provide depends on the template you select and the report type.

   The following table explains all input parameters for Enhanced reports, agents and call centres. Not all fields appear on all report templates.

<table>
<thead>
<tr>
<th>Input field</th>
<th>Description</th>
<th>Allowed value</th>
</tr>
</thead>
</table>
   | Scope             | For Agent reports, it allows you to specify the agents to include in the report. You can check All Agents or Agents. If you check Agents, select agents from the drop-down list.  
   Note: This parameter is disabled when an agent runs the report, since agents can only run reports about themselves.  
   For Call Centre reports, it specifies the call centres or DNIS numbers to include in the report. You can check All Call Centres, Call Centre, or DNIS.  
   • If you check Call Centre, select call centres from the drop-down list.  
   • If you select DNIS, select a call centre and DNIS numbers from the drop-down lists. For DNIS you can also select ALL DNIS.                                                                 | All Agents, Agents, All Call Centres, Call Centre, DNIS                                                                                                                                         |
   | Call Completion   | This setting is used to count the number of ACD calls an agent has completed within a service level during the specified interval. The Call Completion service level can be set to 1 through 7200 seconds.                                                                                                                                         | 1-72000                                                                                                                                                                                                   |
   | Short Duration    | This setting is used to count the number of ACD short duration calls completed by an agent during an interval. You can set the maximum length of a short duration call to 1 through 7200 seconds.                                                                                                                                                    | 1-7200                                                                                                                                           |
   | Service Level     | This setting allows you to provide up to five service levels, used to perform service level calculations for each call centre or DNIS. Each service level can be set to 1 through 7200 seconds.                                                                                                                                                       | 1-7200                                                                                                                                           |
### Generating reports

<table>
<thead>
<tr>
<th>Input field</th>
<th>Description</th>
<th>Allowed value</th>
</tr>
</thead>
</table>
| Service Level Options | These settings are used to determine whether certain types of calls should be included in the service level calculations:  
  • Check Include overflow time transfers in service level to include calls transferred due to time overflow.  
  • Check Include other transfers in service level to include calls transferred for other reasons.  
  • Select one of the following options for abandoned calls  
    − Ignore all abandoned calls to exclude all abandoned calls  
    − Include all abandoned calls to include all abandoned calls  
    − Include all abandoned calls except before entrance completes to include calls abandoned after the entrance message has finished playing  
    − Include all abandoned calls except in interval to include calls abandoned after the time specified by the Abandoned Call Interval parameter. | These options can be checked or unchecked. |
| Abandoned Call Interval | If you selected the Include all abandoned calls except in interval option, enter the desired interval in this text box in seconds.  
  
  1-7200                                                                                                                                   |                                                   |
| Service Level Percentage | This setting allows you to specify the service-level objective (expressed as percent of calls).  
  
  This can be checked as Historical or Real Time.  
  • Historical reports show data from the assigned start date to the assigned end date.  
  • Real-time reports show data from the assigned start date to the present, with the current interval refreshed with real-time data.  
  
  Real-time reports for individual agents contain data for each time interval, with the last interval reflecting real-time data, if requested (subject to the refresh rate). When the interval switches over, the final data for the last time period is captured and shown as historical data, and real-time data is reflected in the new time interval. | Historical or Real – time |
| Start Date | This is the date you want the report to start from. It can be set by typing in the text box or clicking the Calendar icon. This is compulsory. The oldest historical date depends on the interval selected:  
  • 180 days of half-hour interval statistics  
  • 365 days of hourly interval statistics  
  • 730 days of daily interval statistics. | MMM DD, YYYY |
| Start Time | This is the time when you want the report to start from. You can select the hour format (A.M., P.M) from the Hour Selection Type. Time is applicable for hourly and minute intervals only. | 1-12 AM/PM or 00-23 hr |
| End Date | This is the date when you want the report to end. It can be set by typing in the text box or clicking the Calendar icon. This is compulsory when a Historical report is selected. | MMM DD, YYYY |
| End Time | This is the time when you want the report to end. You can select the hour format (A.M., P.M) from the Hour Selection Type. Time is applicable for hourly and minute intervals only. This is compulsory if a Historical report is selected. | 1-12 AM/PM or 00-23 hr |
| Sampling | The sampling period is only applicable to interval-based report templates and determines how the report information will be presented. For example, an hourly report displays information for each hour of the report timeframe. | 15 mins, 30 mins, Hourly, Daily, Weekly, Monthly |
| Output Format | This allows you to specify in what format you would like the report output to be generated. If you select HTML or PDF the report will be displayed in the report window. If you select CSV, a file is created that you can save on your computer. | PDF, CSV, HTML |

The results of the report are displayed in the Report Output area of the window.
Report results (example).

Depending on the report type, the report results can contain the following elements: a pie chart, a bar chart, a table, a high-water marks table, and a line chart.

If you selected HTML or PDF report format when requesting a report, the report is displayed in the report window. If you select CSV, a file is created that you can save on your computer.

This section provides an example of an enhanced report: Abandoned Calls report. For details on the reports available in Call Centre, see the *TIPT Call Centre Reporting Guide*.

The results of the Abandoned Calls report are presented in a bar chart and table.

Agent Activity Report – Scheduling Report
4. Provide the name and the description of the report.

5. Specify the recurrence pattern. From the Recurrence drop-down list, select the type of recurrence for the report from the following options: Never, Daily, Weekly, Monthly, or Yearly. Never signifies that this is a one-time report.

   • If you selected Never, enter the date and time when you want the report to be generated.

   • If you selected Daily, enter the frequency of occurrence in days.

   • If you selected Weekly, enter the frequency of occurrence in weeks and select the day of the week when you want the report to be generated.

Generating reports

Report Recurrence – Weekly

6. If you selected Monthly, enter the frequency of occurrence in months and specify the day when you want the report to be generated. Select one of the following options:

7. To schedule the report on a specific day of the week within the month, for example the second Monday of the month, check The <Xth> <Day-of-Week> of the month and select Xth and Day-of-Week from the drop-down lists.

Report Recurrence – Monthly

8. If you selected Yearly, specify the frequency of occurrence in years, for example every two years, and specify the day for the recurrence of the report.
Generating reports

Select one of the following options:

• To schedule the report on a specific day of the year, check Day <X> of <Month> and select the day and the month.

• To schedule the report on a specific day of the week and month, for example, the first Sunday of January, check The <X>th <Day-of-Week> of <Month> and select Xth, Day-of-Week, and Month from the drop-down lists.

Report Recurrence – Yearly

9. If you selected a recurring report, specify when the reporting should end. Select from the following options:
   • Never.
   • After <X> occurrences, and enter the number of occurrences.
   • Date, and select a date from the calendar.

Report Recurrence – End

10. Enter the e-mail addresses of the recipients of the report.
11. Enter the remaining parameters, as required.
12. Click Schedule Report.

Note: The report is scheduled. It will run at the specified times and sent to the recipients configured in the report schedule.

Manage scheduled reports
You can list, modify, and delete scheduled reports.

To manage scheduled reports:

1. Click the Reporting link at the top right of the main window.
2. From the drop-down list, select Scheduled Reports.
   A Scheduled Reports dialog box appears, listing the reports that you have scheduled.

3. To edit a report, click the Load button in the row for the report, and modify the report as required.
4. To delete a report, click the Delete button in the row for the report.

Note: The first time (only) you choose to run a report in .xls (Excel) format your will receive an information message stating.

   “To help protect your security, Internet Explorer blocked this site from downloading files to your computer. Click here for options....”

When you Click to view option, choose Download File, you will be navigated back to the main Report Template page. Re-run the report and Save the file.

Your Customer Administrator will advise you how to reset your Internet Explorer options to rectify this from occurring.
Configuring supervisor

You use the Settings page, accessed via the Settings link at the top right of the main page to configure various aspects of the Call Centre application.

Logo Pane Links - Settings

To return to the main interface, click the Back To Application link.

Note: Do not use the internet browser's Back button to return to the main interface.

This section provides information about the options that you can set to configure your Supervisor settings.

- Settings – General.
- Settings – Application.
- Settings – Services.
- Settings – Plug-ins.
- Settings – Messaging.
- Settings – Report.
- Settings – About.
Setting – general

You use the General tab to configure miscellaneous settings that improve the usability of Call Centre.

**Account**

You use this area to change your TIPT password.

Call Centre shares logon credentials with TIPT. When you change your password in Call Centre, remember to use this new password when accessing your web portal.

**Note 1:** The password you enter has to meet password requirements set on BroadWorks.

**Note 2:** To ensure secure access, Change Password functionality is only available if HTTPS is used to communicate with the system.

Configuring supervisor

To change your password:

1. Click the Change Password link. The section expands allowing you to change your password.

   ![Change Password section]

   Account – Change Password

   - Enter your current and new password and click Change Password.

   Note: That the Reset button does not reset your password. It only clears the input boxes.

2. Hoteling guest
This setting allows you to configure the Hoteling host, which is required when you use Call Centre from a Hoteling desk/device. This way you do not need to enter this information every time you sign in to Call Centre, provided that you use the same Hoteling device.

   - In the text box, enter the username of the Hoteling host that corresponds to the desk/device you are using, for example, "03xxxxxxx@acme.com"

3. Screen pop
This feature is currently not supported.

4. Date format
The following settings allow you to configure date and time formats used in reports as well as the day of the week to start reports.

   - Date Format: This setting allows you to select the format for displaying dates in reports. The format is used for all dates that are included in the generated report.

   - Time Format: This setting allows you to select the format for displaying time in reports. The format is used for all times that are included in the generated report.

   Note that this setting does not impact the format of events durations, which are always reported in the "DD:HH:MM:SS" format in the generated reports.
Workspace

Call Centre allows you to customise elements of your workspace, such as the size and placement of windows on the desktop. The system remembers the setup between sessions.

The following elements can be customized:

- The size and position of the web browser window in which the main interface is displayed.
- The size of the panes (Call Console, Contacts, and Queued Calls).
- The size and position of the Dashboard window.
- The size and position of any report window.

**Note:** The Position functionality does not work in Internet Explorer, due to a technical limitation of Internet Explorer.

**Save Workspace:** This button, when clicked, saves the current workspace.

**Load Workspace:** This button, when clicked arranges your workspace according to the last saved configuration.

**Restore To Default:** This button, when clicked restores the workspace to the system default configuration.

**Always save workspace on sign out:** When you sign out from the client, Call Centre asks you whether you want to save your current workspace. To save your workspace automatically when signing out, without being asked, check the **Always save workspace on sign out** box.

To customise your workspace:

1. Arrange the windows the way you like.
2. Click the Save Workspace button to save the current configuration. To restore the system default, click Restore To Default.
3. At any time to return to the last saved configuration, click the **Load Workspace** button.

 Appendix A: Glossary and Definitions
 Appendix B: Keyboard Shortcuts

Settings – application
You use the Application tab to configure your application settings. The settings are different for agents and supervisors. They are described in the following subsections.

Queue Memberships

Agent Policies

Barge-in & Monitor
Queue memberships

These settings allow you to select the call centre queues you wish to join.

1. To join a call centre queue, select the check box on the line for the call centre.
2. To join all queues, select the check box in the header.

Note: If you are not allowed to join/leave a queue, the line for the queue is greyed out, and you can only view your join status in the queue. Contact your administrator to change your join status in a queue, if you are not able to do it yourself.

You can select columns to display for queues listed on this page, and sort and group queues by any column.

Agent policies

You use Agent Policies settings to specify your post sign-in ACD state, post call ACD state, wrap-up timer, and outbound CLID:

Post Sign-In ACD State: To configure your post sign-in ACD state, select a state from the Sign-In State drop-down list. Your ACD state is automatically set to the selected state when you sign in to Call Centre.

If you selected Unavailable and unavailable codes are enabled for your organization, select an unavailable code from the drop-down menu.

Post Call ACD State: To configure your post-call ACD state, that is your ACD state upon completion of a call, select a state from the Post Call State list.

If you selected Unavailable and unavailable codes are enabled for your organization, select an unavailable code from the drop-down menu. In most cases, when you select Wrap-Up, you must also configure your wrap-up timer.
Set Wrap-Up Timer to: To set your post-call wrap-up timer, check the `Set Wrap-Up timer to <mm:ss> for queues without a policy box` and enter the time in minutes and seconds. Your ACD state automatically changes from Wrap-Up to Available after the specified period of time.

Make outgoing calls as call centre: Check this box to display a call centre CLID instead of your phone number when you make a call.

Outbound Caller ID: If you checked Make outgoing calls as call centre, select the number to use from the drop-down list.

Note: Your post-call wrap-up timer setting may be overridden if your administrator sets the timer to a smaller value in CommPilot.

Barge-in & monitor
The following options only apply if you have the Directed Call Pickup with Barge In and/or Call Centre Monitoring services assigned.

Barge-In & Monitor
Use warning tone when barging in.

Barging In: When this option is set, the agent hears a warning tone when you barge in on their call.

Monitoring: Not available for Standard Supervisors.
Settings – services

You use the Services tab to configure various services assigned to you by your administrator on BroadWorks and integrated with Call Centre. Those settings are only available if you have been assigned such services. For more information, see your administrator.

The services are grouped into two categories: Active and Inactive.

Settings – Services

The services that you can configure (if you have been assigned the services) are:

Do Not Disturb: When you activate this service, you are not available to take calls and all your calls are automatically sent to your voice mail.

Call Forwarding Always: When you activate this service, you need to provide the phone number to forward your calls to. When the service is active, all your calls are forwarded to the specified number.

To activate a service:

1. Select the service and check the Active box.
   The service is moved from the Inactive to Active category.

2. If you enabled the Call Forwarding Always service, in the Forward To box, enter the number to forward your calls to.

3. To generate a ring splash for incoming calls, check the Ring Splash option.

4. To save your changes, click Save.

Configure web browser
Appendix A: Glossary and Definitions
Appendix B: Keyboard Shortcuts

Settings – Plug-ins

You use the Plug-ins tab to configure the plug-in software used by Call Centre to provide functionality such as call notification, program shortcuts, and call log.

Settings – Plug-ins

You use the Plug-ins area to specify whether desktop integration features of Call Centre should be enabled or disabled.

- Disable All Plug-ins – This setting allows you to enable or disable all desktop integration features. When this option is checked, the JNLP file required to run the desktop integration components will not be downloaded and the desktop integration features will not work.

Notification

These options control when and how call notifications are displayed. The options you can set are as follows:

Focus window for incoming calls: When this option is checked and the browser window running Call Centre is minimized, Call Centre automatically restores the window on incoming calls.

This does not work in Firefox. In Internet Explorer, you have to have only one tab open in the web browser running Call Centre.

Show notification for calls: When this option is checked, Call Centre displays the Call Notification pop-up window on top of other applications’ windows when you receive a call. When you check this box, you need to select an option from the drop-down list to specify the condition under which notifications are displayed.

Note: This does not work if other tabs are open in the same web browser window as Call Centre. Also, if calls come within eight seconds of each other, the Call Notification pop-up window appears only for the first call of that series.

Appendix B: Keyboard Shortcuts

Configuring supervisor

Program shortcuts
You use the Program Shortcuts settings to create Call Centre shortcuts on your desktop for convenient access to Call Centre. The program shortcuts plug-in allows for the creation of desktop shortcuts on a Windows platform, which when clicked, launches the applications in your default web browser.

Add Shortcut: This button, when clicked, creates a Call Centre shortcut on your desktop.

Remove Shortcut: This button, when clicked, removes the previously created Call Centre shortcut. If you did not create a shortcut using the Add Shortcut button, the Remove Shortcut button has no effect.

Call event log
This plug-in software provides the ability to store call event statistics content locally on your computer.

- Enable/Disable Call Event Log Integration – This double-action button allows you to enable or disable call log archives on your computer.
- Rotate Log – This parameter allows you to specify the frequency with which the call log is rotated. You select the frequency from the drop-down list.
- Open Log Location – Click this link to go to the place on your computer where the log is stored.

The log is saved at the desired interval as a comma separated value (CSV) file in the following path:

\<Drive>\Documents and Settings\<Windows_Username>\Application Data\BroadSoft\BW Call Center\profiles\<BW_UserID>\statistics

where:

- Drive is the drive letter where your profile is stored (typically C).
- Windows_Username is your Windows user name.
- BW_UserID is your BroadWorks user ID.
The following events are captured based on activity that occurs on the Agent/Supervisor client (irrespective of ACD or direct inbound or outbound calls).

<table>
<thead>
<tr>
<th>Statistic</th>
<th>Description</th>
<th>Allowed values</th>
<th>Example value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Broadworks User ID</td>
<td>Broadworks User ID</td>
<td>String</td>
<td><a href="mailto:jsmith@abc.net">jsmith@abc.net</a></td>
</tr>
<tr>
<td>Call Centre ID</td>
<td>Call Centre ID for inbound ACD calls only</td>
<td>String, null</td>
<td>ABCSales</td>
</tr>
<tr>
<td>Availability</td>
<td>Agent’s joined state</td>
<td>Joined, Not Joined, null</td>
<td>Joined</td>
</tr>
<tr>
<td>ACD State</td>
<td>Agent’s ACD state</td>
<td>Sign-On, Available, Unavailable, Wrap-Up, Sign-But, null</td>
<td>Null</td>
</tr>
<tr>
<td>Call ID</td>
<td>ID of the call</td>
<td>String, null</td>
<td>192.168.15.1</td>
</tr>
<tr>
<td>Call State</td>
<td>State of the call</td>
<td>Idle, Incoming, Outgoing, Active, Held, Remote Held, Detached, Released, null</td>
<td>Incoming</td>
</tr>
<tr>
<td>Personality</td>
<td>The personality of the call. It indicates whether the user originated this call or whether the call was placed to the user</td>
<td>Integer (0, 1, 2): 0 = BroadWorks Originator 1 = Originator 2 = Terminator</td>
<td>0</td>
</tr>
<tr>
<td>Remote Name</td>
<td>External caller name</td>
<td>String or null</td>
<td>null</td>
</tr>
<tr>
<td>Remote Number</td>
<td>External caller number</td>
<td>String or null</td>
<td>5555551234</td>
</tr>
<tr>
<td>Last Redirected Name</td>
<td>Last redirected name</td>
<td>String or null</td>
<td>Jane Doe</td>
</tr>
<tr>
<td>Last Redirected Number</td>
<td>Last redirected number</td>
<td>String or null</td>
<td>null</td>
</tr>
<tr>
<td>Time</td>
<td>Date stamp of record</td>
<td>Long Date/Time Format</td>
<td>2008-04-03 12:08:17.859</td>
</tr>
</tbody>
</table>

**Note:** Each row in the log file records a single event change and as such, columns like Availability, ACD State, and Call State may contain null values since an alternate column value caused the event change. For example, Wrap-Up is stored in ACD State while Call State (and other columns) store null.

**Activity archive**

This plug-in software provides the ability to store call event statistics content locally on your computer.
Enable/Disable Call Event Log Integration: This double-action button allows you to enable or disable call log archival on your computer.

Rotate Log: This parameter allows you to specify the frequency with which the call log is rotated. You select the frequency from the drop-down list.

Open Log Location: Click this link to go to the place on your computer where the log is stored.

Settings – messaging
The Messaging tab allows you to configure various messaging options for Call Centre. Currently, only e-mail messaging is supported.

Settings – Messaging
From the drop-down list, select the mail client to use for e-mails.
If you selected the custom SMTP option, you also need to configure the following options:

Display Name: This is the name that will be displayed in the From field.
Reply-to Address: This is the address where reply messages can be sent.
Default Subject: This is the subject that will appear when you generate and e-mail message in Call Centre.
SMTP Host: This is the IP address of the SMTP host.
SMTP Port: This is the port of the SMTP host.
Outgoing SMTP Server requires Authentication: When this option is set, authentication is required to send e-mails.
Username: This is the name you must enter to authenticate yourself. Password: This is the password part of your authentication credentials. Mail Type: This is the type of mail to use.
Mail Template: This is the mail template to use.

Settings – report

You use the Report tab to configure values to be used as default input parameters for generating reports. If you do not provide any values, system defaults are used. You can change those values as required when generating reports.

![Configuration interface]

**Default thresholds**

These settings allow you to configure the thresholds that will be used by default when you generate reports that require you to provide thresholds. This is useful, if you often use the same threshold values. You can always change a default value, when required.

- **Call Completion**: This setting is used to count the number of ACD calls an agent has completed within a service level during the specified interval. The Call Completion service level can be set to 1 through 7200 seconds.

- **Short Duration Call**: This setting is used to counts of the number of ACD short duration calls completed by an agent during an interval. You can set the maximum length of a short duration call to 1 through 7200 seconds.

- **Default Start Day Of Week**: This setting applies to interval-based reports, when the selected sampling period is “Weekly”. It can be set to any day of the week.

Settings – About

The following information is provided on this page:

**Version:** This is the name and software version of BroadWorks Call Centre client.

**Profile:** This is the Call Centre client profile used.

**Disclaimer:** This is the Call Centre copyright information.
Configure web browser

In Firefox 24 or later, the `dom.disable_window_flip` preference must be set to “false” for quick link navigation to work. If this setting is not configured, Call Centre does not change focus from the Dashboard to the main application window when the user clicks on a quick link.

1. Open a new tab in Firefox.
2. In the address bar, type “about:config”. A list of preferences appears.
3. Go down to `dom.disable_window_flip` and set its value to “false”.

Certificate for desktop integration features

A certificate required to run Call Centre desktop integration features must be added to the browser-specific certificate store location on your machine. For the list of the desktop integration features, see section Settings – Plug-ins.

<table>
<thead>
<tr>
<th>Browser</th>
<th>Certificate Store</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chrome</td>
<td>Chrome Certificate Store</td>
</tr>
<tr>
<td>Internet Explorer</td>
<td>Windows Certificate Store</td>
</tr>
<tr>
<td>Firefox</td>
<td>Firefox Certificate Store</td>
</tr>
</tbody>
</table>

The following subsections provide instructions for allowing the certificate to be added to your device in the different environments.

Microsoft windows certificate store

If the Certificate is not yet imported to the certificate storer, the following dialog box appears.
Welcome to Standard Call Centre for Supervisors!

Managing call history
E-mailing contacts
Managing contacts
Dashboard
Generating reports
Configuring supervisor
Configure web browser
Appendix A: Glossary and Definitions
Appendix B: Keyboard Shortcuts

1. Click **Yes** to install the certificate.
If you are denied access to the certificate trust store to import the certificate, the following dialog box appears

2. Click **Yes** to install the certificate.

Firefox certificate store

Mozilla Firefox has its own certificate store. If the certificate is not yet imported to the Firefox certificate store and if the browser is open during the current session, the following dialog box appears.

Note: Call Centre client only verifies the last profile to see if the certificate already exists. If you have multiple profiles in Firefox and desktop integration features do not work, create a new profile or delete the certificate from the latest profile by navigating to **Tools → Options → Advanced → View Certificate → Authorities → BroadSoft (127.0.0.1)**. This will import the certificate to all the profiles present.
Security settings for desktop integration features

As you sign in to Call Centre, a JNLP file is downloaded, and you are asked to click the link shown in the browser. Due to security restrictions, the application may not run. If this occurs, perform the steps specified in the following subsections.

**Note:** You should run Java JRE 1.6 or higher.

**Internet Explorer**

If you're running Internet Explorer, you must perform the following steps to run JNLP.

**Note:** You must run Call Centre over HTTPS with Internet Explorer.

1. From the Internet Explorer **Menu** bar, select Tools and then **Internet Options**. The **Internet Options** window appears.
Welcome to Standard Call Centre for Supervisors!

2. Click the Security tab.

3. Click Trusted sites and then click Sites. The Trusted sites window appears.
4. In the Add this website to the zone text box, enter each of the following CallCentre client URL's and then click Add.
   - https://callcentre.tipt.telstra.com
   - https://callcentre-exhi.tipt.telstra.com
   - https://callcentre-stld.tipt.telstra.com
   - https://callcentre-pitt.tipt.telstra.com
5. The URL appears in the Websites text box.
6. Click Close.
7. In the Internet Options window, click Custom level. The Security Settings – Trusted Sites Zone window appears.
8. Scroll down to the Miscellaneous settings section and select Enable for the Access data sources across domains.
9. Click Yes in the Warning! window that appears.
10. Click OK and then click OK in the Internet Options window.
### Appendix A: Glossary and Definitions

ACD states specify the agent’s availability to take calls. The possible call states are as listed in the following table.

<table>
<thead>
<tr>
<th>ACD state</th>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Available</td>
<td><img src="image" alt="Available Icon" /></td>
<td>Agent is available to receive ACD calls. (Agent can also receive direct calls.) This is the primary ACD state of an agent during the workday. It indicates that the agent is at their workstation and either ready to take a call or on an active call. ACD calls may be delivered to an agent who is in an Available state. BroadWorks uses both the ACD state and the phone state of the agent to determine whether to route a call to the agent. By default, agents receive calls when they are available and their phone is idle. However, this behavior can be overridden if Call Waiting on agents is enabled for the call centre, which allows for new calls when the agent is available and on an active call.</td>
</tr>
<tr>
<td>Unavailable</td>
<td><img src="image" alt="Unavailable Icon" /></td>
<td>Agent is unavailable to receive ACD calls. (Agent can still receive direct calls.) The Unavailable state should be used when the agent is away from their workstation and not available to take calls. ACD calls are not delivered to agents in an Unavailable state. This state should be used when the agent is at lunch, on a break, in a meeting, or engaged in some other activity while they are at work, but unavailable to take calls.</td>
</tr>
<tr>
<td>Wrap-Up</td>
<td><img src="image" alt="Wrap-Up Icon" /></td>
<td>Agent is performing post call work. This state is designed to allow the agent to complete paperwork or other post call procedures associated with the last call. Calls may be delivered to agents in Wrap-Up state depending on the call centre configuration. By default, calls are not routed to agents in Wrap-Up state, except when the call centre is configured to enable calls to agents in the Wrap-Up state.</td>
</tr>
<tr>
<td>Sign-In</td>
<td><img src="image" alt="Sign-In Icon" /></td>
<td>The Sign-In state is equivalent to a “clock in”, which means that the agent is at their work location but is not yet ready to accept incoming calls. Calls are not delivered to the agent in this state. Sign-In is a transitional state and agents do not remain in this state; rather they transition to their post sign-in state. It is recommended that agents only be in this state between the time they arrive at work and the time they become available to accept calls.</td>
</tr>
<tr>
<td>Sign-Out</td>
<td><img src="image" alt="Sign-Out Icon" /></td>
<td>The Sign-Out state is equivalent to a “clock out”, which means that the agent’s workday or shift is completed and they are leaving. Calls are not delivered to the agent in this state. It is recommended not to use this state when agents leave for lunch or breaks during the day. The Unavailable state should be used for that.</td>
</tr>
</tbody>
</table>

In the Standard Call Centre, an agent can set their ACD state to Available, Unavailable, or Wrap-Up. A supervisor can set the ACD state of an agent to Available, Unavailable, Wrap-Up, or Sign-Out.

The Sign-In state can only be assigned to an agent through CommPilot.
### Phone states

Phone states show the state of the monitored agent's or supervisor's telephone line. For supervisors, the phone states are displayed as follows:

<table>
<thead>
<tr>
<th>Phone state</th>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Idle</td>
<td>![Green Icon]</td>
<td>Supervisor's phone is on-hook, which means the supervisor is not on a call.</td>
</tr>
<tr>
<td>Busy</td>
<td>![Red Icon]</td>
<td>Supervisor's phone is off-hook, which means that the supervisor is on a call.</td>
</tr>
<tr>
<td>Ringing</td>
<td>![Yellow Icon]</td>
<td>Supervisor's phone is in an alerting state; a call is currently being delivered to the supervisor.</td>
</tr>
<tr>
<td>Do Not Disturb</td>
<td>![Red Icon]</td>
<td>Supervisor has enabled the Do Not Disturb service.</td>
</tr>
<tr>
<td>Call Forwarding Always</td>
<td>![Red Icon]</td>
<td>Supervisor has enabled the Call Forwarding Always service. (Moving the mouse over this icon displays the number where the calls are forwarded.)</td>
</tr>
<tr>
<td>Unknown</td>
<td>![Gray Icon]</td>
<td>Supervisor's phone state is currently unavailable or unknown.</td>
</tr>
</tbody>
</table>

For agents, the phone states are combined with their ACD states and are displayed as follows:

<table>
<thead>
<tr>
<th>Phone state</th>
<th>ACD state</th>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Idle</td>
<td>Available</td>
<td>![Green Icon]</td>
<td>Agent’s phone is on-hook and the agent is available to take ACD calls.</td>
</tr>
<tr>
<td>Ringing</td>
<td>Available</td>
<td>![Yellow Icon]</td>
<td>Agent’s phone is ringing and the agent is available to take the call.</td>
</tr>
<tr>
<td>Any</td>
<td>Unavailable, Sign-In, Sign-Out</td>
<td>![Red Icon]</td>
<td>Agent is not available to take ACD calls.</td>
</tr>
<tr>
<td>Idle, Ringing</td>
<td>Wrap-Up</td>
<td>![Yellow Icon]</td>
<td>Agent is performing post-call work. They may or may not be available to take calls.</td>
</tr>
<tr>
<td>Busy</td>
<td>Available, Wrap-Up</td>
<td>![Red Icon]</td>
<td>Agent’s phone is off-hook, which means that the agent is on a call. Whether calls MAY be delivered to agents depends on their call waiting settings, and the call centre's call waiting and wrap-up settings.</td>
</tr>
<tr>
<td>Do Not Disturb</td>
<td>Any</td>
<td>![Gray Icon]</td>
<td>Agent has enabled the Do Not Disturb service. ACD calls are not delivered to agent in the Do Not Disturb call state. This state is NOT RECOMMENDED for Call Centre agents. Agents should use the Unavailable ACD state when they need to temporarily block new incoming calls.</td>
</tr>
<tr>
<td>Call Forwarding Always</td>
<td>Any</td>
<td>![Red Icon]</td>
<td>Agent has enabled the Call Forwarding Always service. (Moving the mouse over this icon displays the number where the calls are forwarded.)</td>
</tr>
<tr>
<td>Unknown</td>
<td>Any</td>
<td>![Gray Icon]</td>
<td>Agent’s call state is currently unavailable or unknown.</td>
</tr>
</tbody>
</table>
### Call states

Call states are the states that your current calls can be in.

<table>
<thead>

</table>

### Call types

This section defines different types of calls measured in call centre statistics.

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACD Call</td>
<td>A call delivered to a call centre pilot number that is directed to an agent via the ACD function.</td>
</tr>
</tbody>
</table>
| Inbound Call        | A direct call to an agent. Other calls treated as Inbound calls include:  
• Calls that a supervisor retrieves from a queue  
• Calls that an agent receives due to a transfer from another agent (Note that they may have originated as ACD calls).                                                                                                                                                                           |
| Outbound Call       | An outbound call made by an agent.                                                                                                                                                                                                                                                                                                          |
| Held Call           | An ACD call that was placed on hold by an agent. Each time an agent places a call on hold, it is counted as a held call.                                                                                                                                                                                                                   |
| Transferred Call    | An ACD call that was transferred to another number. Transfers can be the result of manual transfers by agents, transfers to voice mail because the calls were timed out, and transfers by supervisors to alternate queues.  
**Note:** A timed-out call is a call that is transferred due to exceeding the maximum wait time in a queue.                                                                                                                                                                                                                       |
| Answered Call       | An ACD call that was answered by an agent.                                                                                                                                                                                                                                                                                                 |
| Abandoned Call      | An ACD call that entered the queue, but the caller hung up before the call was answered or transferred.                                                                                                                                                                                                                                      |
| Received Call       | An ACD call that was received and either answered or abandoned. Overflowed calls are not included.                                                                                                                                                                                                                                        |
| Overflowed Call      | An ACD call that was received, but immediately transferred to another destination due to the queue’s exceeding the configured maximum queue size or the configured maximum wait time.                                                                                                                                                        |
| Queued Call         | An ACD call that is not immediately diverted using the Night Service, Holiday Service, Forced Forwarding, or Overflow and goes to a queue to be distributed to an agent or to wait for an available agent.                                                                                                                                                  |
| Bounced Call        | A call that has been transferred back to queue because it was not answered by an agent in the specified time.                                                                                                                                                                                                                                 |
| Stranded Call       | A call that is in a queue after all agents assigned to the queue have moved to the Sign-Out ACD state.                                                                                                                                                                                                                                      |
### Appendix B: Keyboard Shortcuts

When using keyboard shortcuts, make sure that the main interface window is in focus.

<table>
<thead>
<tr>
<th>Key</th>
<th>Equivalent Mouse Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC</td>
<td>Click the Close button in a dialog box</td>
<td>Closes the open dialog box.</td>
</tr>
<tr>
<td>ESC</td>
<td>Cancel the changes.</td>
<td>Exits the currently selected editable item, such as a text box.</td>
</tr>
<tr>
<td>/</td>
<td>Click the Dialer text box.</td>
<td>Places the cursor in the Dialer text box, retains the currently selected item (if applicable).</td>
</tr>
<tr>
<td>?</td>
<td>Click the Search text box.</td>
<td>Places the cursor in the Search Contacts text box, retains the currently selected item (if applicable).</td>
</tr>
<tr>
<td>ARROW DOWN</td>
<td>Click the scroll bar or the next item in a list.</td>
<td>Selects the next item in the Call Console or Queued Calls pane.</td>
</tr>
<tr>
<td>ARROW UP</td>
<td>Click the scroll bar or the previous item in a list.</td>
<td>Selects the previous item in the Call Console or Queued Calls pane.</td>
</tr>
<tr>
<td>PAGE DOWN</td>
<td>Scroll down one page.</td>
<td>Goes to the next page in the Call Console or Queued Calls pane.</td>
</tr>
<tr>
<td>PAGE UP</td>
<td>Scroll up one page.</td>
<td>Goes to the previous page in the Call Console or Queued Calls pane.</td>
</tr>
<tr>
<td>1...9</td>
<td>Select a call in the Call Console pane. Pressing “1” selects the first call; pressing “2” selects the second call; and so on.</td>
<td></td>
</tr>
<tr>
<td>SPACEBAR</td>
<td>Click Answer on the selected incoming call in the Call Console pane. Answers the selected incoming call, or if no call is selected, the incoming call that has been waiting the longest. Pressing the SPACEBAR again answers the next longest-waiting incoming call, which puts the previously answered call on hold.</td>
<td></td>
</tr>
<tr>
<td>&lt;PERIOD&gt;</td>
<td>Click End on the selected call in the Call Console pane.</td>
<td>Ends the selected call.</td>
</tr>
<tr>
<td>ENTER</td>
<td>Click Dial.</td>
<td>If the cursor is placed in the Enter Number text box in the Dialer, dials the entered digits.</td>
</tr>
<tr>
<td>ENTER</td>
<td>Click Search.</td>
<td>If the cursor is placed in the Search Contacts text box, performs a search.</td>
</tr>
<tr>
<td>+</td>
<td>Click Transfer in the Dialer.</td>
<td>Transfers the selected call to the ad-hoc number entered in the Dialer.</td>
</tr>
<tr>
<td>SHIFT+1..9</td>
<td>Select a ringing call and click Answer</td>
<td>Pressing “SHIFT+1” selects and answers the first ringing call, pressing “SHIFT+2” selects and answers the second ringing call, and so on.</td>
</tr>
<tr>
<td>SHIFT+1..9</td>
<td>Select an active call and click Hold</td>
<td>Pressing “SHIFT+1” selects and answers the first active call, pressing “SHIFT+2” selects and answers the second active call, and so on.</td>
</tr>
<tr>
<td>SHIFT+1..9</td>
<td>Select a held call and click Retrieve</td>
<td>Pressing “SHIFT+1” selects and retrieves the first held call, pressing “SHIFT+2” selects and retrieves the second held call, and so on.</td>
</tr>
<tr>
<td>S or s</td>
<td>Click the Settings link.</td>
<td>Goes from the main page to the Settings page.</td>
</tr>
<tr>
<td>B or b</td>
<td>Click the Back to Application link.</td>
<td>Goes back from Settings page to the main page.</td>
</tr>
<tr>
<td>R or r</td>
<td>Click the Call History button.</td>
<td>Opens the Call History dialog box.</td>
</tr>
<tr>
<td>H or h</td>
<td>Click the Help link.</td>
<td>Opens this guide in a PDF format.</td>
</tr>
<tr>
<td>D or d</td>
<td>Click the Dashboard link (Supervisor)</td>
<td>Opens the Dashboard or brings the Dashboard to the front if it is already open.</td>
</tr>
<tr>
<td>SHIFT+L or SHIFT+1</td>
<td>Click the Sign Out link.</td>
<td>Signs the user out of the application.</td>
</tr>
<tr>
<td>SHIFT+W</td>
<td>Select Wrap-Up (Agent).</td>
<td>Sets the agent's ACD state to Wrap-Up.</td>
</tr>
