

# Telstra IP Telephony – Jabra GN9450 Headset

## Connecting the Headset to the Handset Quick Reference Guide

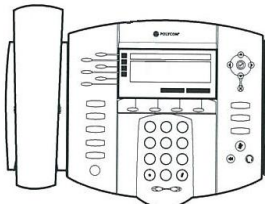

### Equipment

Base Station & Headset

Telstra IP Phone

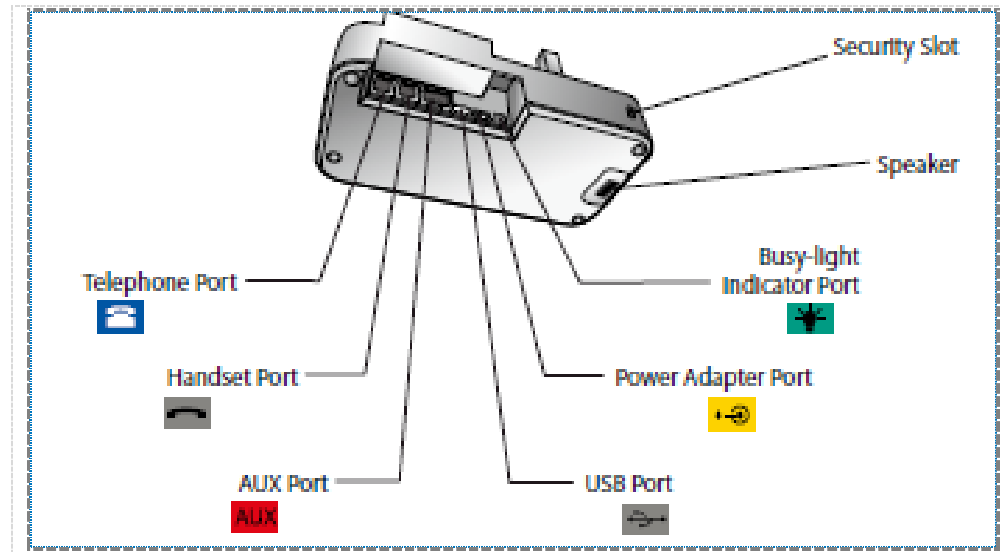

### 1. Connecting the Headset to the Telstra IP Phone

- Connect the headset ear piece to the headband or ear-hook.

#### On the Base of the Jabra GN9450:

- Connect the power adapter cable to the **yellow** port on the back of the base station and to the mains power socket.
- Take the Polycom EHS cable out of the bag and connect it to the red **AUX** port on the back of the base station and then the 5pin jack to the back of your phone.
- Connect the supplied telephone cable to the **blue** telephone port on the back of the base station and to the telephone headset port on the back of the phone.
- Connect the supplied USB cable into the USB port at the back of the base station and then into a USB port on your PC.

### Back of Jabra 9450 Base Station

### 2. Configuring the Base Station

#### On the Base of the Jabra GN9450:

- Remove the *Jabra Pro* front panel on the base station.
- Ensure the Dial tone selector is set to **"A"**
- To adjust the Microphone volume, slide the microphone dial to increase or decrease the volume as required.
- Press the headset button on the phone to enable the headset to receive calls.

### 3. Setting up the Phone

- On the phone press **Menu button**.
- Select the following options **Settings>Basic>Preferences>Headset>Analog Headset Mode**.
- Use the up or down arrows and select **Jabra DHSG**.
- Press the **Select** soft key.
- Press the **Menu** button again to return to an idle screen.
- The phone will now automatically reboot itself
