

# Telstra Business Connect Portal User

Use the Telstra Business Connect portal to redefine your default user settings. You can set or change your default network group policy for each device i.e. Mobile or tablet. This allows you to stipulate whether you wish to connect via the internet or VPN for all your devices. Desktop is configured to auto-switch the settings connecting via Internet or VPN.

## To sign into the portal

Use the following URL to sign into the Telstra Business Connect portal <https://ucone.tipt.telstra.com>

## Log into the portal

Log into the portal using your standard Telstra Business Connect login.

1. Type your standard Telstra Business Connect **Username** and **Password**
2. Tap **Log in**

A screenshot of the Telstra Business Connect Collaborate Portal login page. The page has a dark grey navigation bar at the top with links for 'Telstra.com', 'Personal', 'Small Business', 'Business & Enterprise', 'Health', and 'Sport & Entertainment'. Below the navigation bar is a white header with the Telstra logo and 'BUSINESS & ENTERPRISE'. The main content area has a green and white background with the title 'TELSTRA BUSINESS CONNECT COLLABORATE PORTAL'. On the left, there is a 'Log in' section with two input fields for 'Username' and 'Password', and a green 'Log in' button with a right-pointing arrow. On the right, there is an 'Information' section with text explaining the portal's purpose and availability.

## TELSTRA BUSINESS CONNECT COLLABORATE PORTAL

### Log in

  
  
 >

### Information

Use this portal to give yourself control on how your Telstra Business Connect clients connect - using your company's VPN network, or the internet.

If there is a Telstra Business Connect client you haven't got yet (did you know there is a tablet version of Telstra Business Connect?), log in and you can also provision one for yourself!

This portal is available for all Customer Group Admins and Users eligible for Telstra Business Connect. Just log in using your existing CommPilot/CommManager/Telstra Business Connect credentials.

## Select your Telstra Business Connect network settings

To change your network settings:

1. For each device select to **Let My Network Administrator Choose** (default), **Internet** or **Company Network** (VPN)
2. Click on **Apply** to save your changes

### My Telstra Business Connect Network

Select how you would like Telstra Business Connect to connect to your TIPT Service.

Use the **Company Network** option if you are connected to your company's network or to your company's VPN.

Use the **Internet** option if you're on the move and not connected to your company's VPN network. Note that this will cause phone calls you make and receive through Telstra Business Connect to use your mobile phone data allowance if you are not connected to a WiFi network.

Telstra business Connect PC has the capability of Auto Switching from Corporate Network to Internet and Vice Versa, therefore we don't need to manually choose the options.

If you are unsure which option you should be using, it may be best to select the **Let My Customer Group Administrator Choose** option.

	Let My Network Administrator Choose	Internet	Company Network
Telstra Business Connect Desktop (Auto Switching)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Telstra Business Connect Mobile	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Telstra Business Connect Tablet	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
UC-One Desktop	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
UC-One Mobile	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

**Enable Lync Integration for my Telstra Business Connect Desktop client**

Lync integration will only work on Telstra Business Connect with Lync integration version, not on standard Telstra Business Connect

**Apply >**

## Provisioning a device

It's important that all of your devices are provisioned in order to select a network option. To Provision a device.

1. Select the **Provision** checkbox next to the device that you wish to provision.

## Enable Lync Integration

2. To enable Lync integration to your desktop client place a tick in the **Enable Lync Integration** check box.

**Enable Lync Integration for my Telstra Business Connect Desktop client**

3. Click on **Apply**.

## Log out

Click on the **Logout** button  to exit the Portal.
