

VERITAS ENTERPRISE VAULT.CLOUD™ SERVICE

INFORMATION ABOUT THE SERVICE

Your plan is for a Veritas Enterprise Vault.cloud™ service which is available through the Telstra Apps Marketplace.

The Veritas Enterprise Vault.cloud™ service is a cloud based email archiving service that archives internal and external emails off-site, while providing access to emails after they've been archived. You need a licence for each user of the application (User SL) and you must select a minimum of 10 users.

Your email system or other relevant system must be permanently connected to the Internet with a fixed IP address (not through dial-up or IDSN) to use the Veritas Enterprise Vault.cloud™ service.

Telstra Apps Marketplace

The Telstra Apps Marketplace is a web-based marketplace that enables you to purchase and manage various software applications that we make available from time to time.

You need an internet connection to access the Telstra Apps Marketplace. To start using the Telstra Apps Marketplace, visit marketplace.telstra.com and create an account.

You may need to meet minimum system requirements to use certain applications available on the marketplace, which will be set out on telstra.com/marketplacesupport and Our Customer Terms.

You're responsible for ensuring that you meet these requirements.

Minimum term

24 months.

You can add additional users at any time, and if you do, the term for each additional user will end at the same time as your initial application term.

What's included

You can choose from two Veritas Enterprise Vault.cloud™ service packages, as described in the table below.

Important information

- The maximum email size (including attachments) that can be ingested by the Veritas Enterprise Vault.cloud™ service is 50MB.
- The Veritas Enterprise Vault.cloud™ service doesn't replace your need to backup your mail server locally. In the event that you need to rebuild your mail server, you should rebuild it from locally managed data rather than from the Veritas Enterprise Vault.cloud™ service archive.
- We'll keep your data for 120 days after the expiry of your initial term or the date your service otherwise ends. You need to tell us in writing before that date if you want a copy of your data, in which case we'll supply one to you in PST format via hard disk media (up to 2TB per month) until all your data is returned to you. You'll need to pay us our (or our supplier's) current rates for this work. If you don't ask us to do this we will delete your data.
- You must have Symantec.cloud Email Protect, Symantec.cloud Email Safeguard or Symantec.cloud Email and Web Safeguard or intend to purchase these services from Telstra Apps Marketplace when purchasing Veritas Enterprise Vault Enhanced.cloud™ from us.
