

CUSTOMER SERVICE ADVICE FROM TELSTRA.

Extreme Weather events impact service in Perth and Lower West region of Western Australia

As previously notified by Telstra on Thursday 26 January 2012, Telstra's normal operations in the Perth and Lower West region of Western Australia were affected by extreme weather events on or about Friday 20 January 2012.

Telstra's telecommunications network in these areas have experienced high levels of damage that has resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the continued weather effects, the expected recovery date has now been extended to 20 February 2012.

Telstra has identified that the effect of these circumstances may apply to an additional 4600 services bringing the total number of potential services impacted to approximately 9100 services. This number may increase as Telstra assesses the full affect of the extreme weather conditions.

Based on current information, the resumption date of normal service operations is expected to be 20 February 2012. This date is indicative only; Telstra customers should anticipate that some further delays may occur.

Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
