

CUSTOMER SERVICE ADVICE FROM TELSTRA

Extreme Weather events impact service in North West Slopes and Plains, Northern Rivers, Northern Tablelands, Mid North Coast and Upper Western.

Telstra is working to manage the significant impact to Telstra services that has occurred as a result of a series of extreme weather events in the North West Slopes and Plains, Northern Rivers, Northern Tablelands, Mid North Coast and Upper Western regions of New South Wales on or about Tuesday 17 April 2012 through to Friday 20 April 2012.

Due to the effect of damage to the Telstra telecommunications network by thunderstorms, heavy rain and flash flooding, there has been a significant increase in the number of Telstra services being reported as faulty. As a result, there has been some disruption to service and delays to normal installation and repair activities.

Telstra apologises to any affected customers.

Information as to the nature of these severe weather events can be sourced from the Bureau of Meteorology (BOM). Thunderstorms, heavy rain and flash flooding are referred to in the BOM Severe Weather Warning issued for 17 April 2012 initially at 5:22am, Tuesday 17 April 2012; all of which were widely reported in the news media after the events.

Telstra has identified that the effect of these circumstances may apply to approximately 3200 services. Some of these services may not be installed or repaired within Telstra's standard time frames. The number of possibly affected services may increase or decrease as Telstra assesses the full effect of the extreme weather conditions. Based on current information, the resumption date of Telstra's normal service operations is expected to be 4 May 2012. This date is indicative only, however, and may be subject to change once the full impact of the extreme weather conditions has been assessed. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
