

Customer Service Advice from Telstra.

Extreme Weather events impact service in North Tropical Coast and Tablelands, Herbert and Lower Burdekin, Central Coast-Whitsundays, Capricornia, Central Highlands and Coalfields and Wide Bay and Burnett districts.

Telstra is working to manage the significant impact to Telstra services that has occurred as a result of a series of extreme weather events in the North Tropical Coast and Tablelands, Herbert and Lower Burdekin, Central Coast-Whitsundays, Capricornia, Central Highlands and Coalfields and Wide Bay and Burnett region's of Queensland on or about Tuesday 10 July 2012 through to Friday 13 July 2012.

Due to the effect of damage to the Telstra telecommunications network by severe thunderstorms, heavy rain and flash flooding there has been a significant increase in the number of Telstra services being reported as faulty. As a result, there has been significant disruption to service and delays to normal installation and repair activities.

Telstra apologises to any affected customers.

Information as to the nature of these severe weather events can be sourced from Weatherzone at www.weatherzone.com.au. Very heavy rainfall and damaging winds are referenced; all of which were widely reported in the news media after the events.

Telstra has identified that the effect of these circumstances may apply to approximately 6,800 services. Some of these services may not be installed or repaired within Telstra's standard time frames. The number of possibly affected services may increase or decrease as Telstra assesses the full effect of the extreme weather conditions. Based on current information, the resumption date of Telstra's normal service operations is expected to be 27 July 2012. This date is indicative only, however, and may be subject to change once the full impact of the extreme weather conditions has been assessed. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
