Customer Service Advice from Telstra

Extreme Weather events impact service in Hunter and Mid North Coast Districts of New South Wales.

As previously notified by Telstra on Monday 5 May 2014, Telstra’s normal operations in the Hunter and Mid North Coast Districts of New South Wales were affected by a series of extreme weather events on or about Friday 25 April 2014. Telstra’s telecommunications network in these areas have experienced high levels of damage that resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the continued weather effects, the expected recovery date has now been extended to 1 June 2014.

Telstra has identified that the effect of these circumstances applies to an additional 1,700 services bringing the total number of services impacted to approximately 8,350 services. This number may increase as Telstra assesses the full affect of the extreme weather conditions. Based on current information, the resumption date of normal service operations is expected to be 1 June 2014. This date is indicative only; Telstra customers should anticipate that some further delays may occur. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
