

Customer Service Advice from Telstra

Extreme Weather events impact service in North Central, North East, East Gippsland and Northern Country Districts of Victoria and Snowy Mountains and part of the South Coast District of New South Wales.

As previously notified by Telstra on Thursday 11 December 2014, Telstra's normal operations in the North Central, North East, East Gippsland and Northern Country Districts of Victoria and Snowy Mountains and part of the South Coast District of New South Wales were affected by a series of extreme weather events on or about on or about Friday 5 December 2014 through to Saturday 6 December 2014. Telstra's telecommunications network in these areas have experienced high levels of damage that resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the continued weather effects, the expected recovery date has now been extended to 4 January 2015.

Telstra has identified that the effect of these circumstances applies to an additional 950 services bringing the total number of services impacted to approximately 2,250 services. This number may increase as Telstra assesses the full affect of the extreme weather conditions. Based on current information, the resumption date of normal service operations is expected to be 4 January 2015. This date is indicative only; Telstra customers should anticipate that some further delays may occur. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
