

Customer Service Advice from Telstra

Extreme Weather events impact service in Darwin.

Telstra is working to manage the significant impact to Telstra services that has occurred as a result of a series of extreme weather events in the Darwin region of the Northern Territory on or about Thursday 1 January 2015.

Due to the effect of damage to the Telstra telecommunications network by a monsoonal trough, there has been a significant increase in the number of Telstra services being reported as faulty. As a result, there has been some disruption to service and delays to normal installation and repair activities.

Telstra apologises to any affected customers.

Information as to the nature of these severe weather events can be sourced from Weatherzone at <http://www.weatherzone.com.au/>. Heavy rainfall across the Darwin catchment area is detailed within this site for Friday 2 January 2015; which was reported in the news media after the events.

Telstra has identified that the effect of these circumstances may apply to approximately 550 services. Some of these services may not be installed or repaired within Telstra's standard time frames. The number of possibly affected services may increase or decrease as Telstra assesses the full effect of the extreme weather conditions. Based on current information, the resumption date of Telstra's normal service operations is expected to be 25 January 2015. This date is indicative only, however, and may be subject to change once the full impact of the extreme weather conditions has been assessed. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.

From Berry Springs the area then heads northwest to Middle Arm and follows the coastline past East Arm, Darwin and Lee Pt back to Gunn Point. All suburbs, towns, off shore islands and coastal areas serviced by Telstra within these boundaries are encompassed in this exemption.
