

# Customer Service Advice from Telstra

## **Ongoing Extreme Weather events impact service in East Coast, South East, Western, Upper Derwent Valley and Central Plateau Districts of Tasmania.**

As previously notified by Telstra on Tuesday 20 January 2015 and Monday 9 February 2015, Telstra's normal operations in the East Coast, South East, Western, Upper Derwent Valley and Central Plateau Districts of Tasmania have been affected by ongoing extreme weather events on or about Tuesday 13 January 2015 continuing to date.

Telstra's telecommunications network in these areas have experienced high levels of damage that has resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the ongoing weather effects, the expected recovery date has now been further extended to 8 March 2015.

Information as to the nature of these severe weather events can be sourced from Weatherzone at <http://www.weatherzone.com.au/>. Heavy rainfall across the aforementioned area is detailed within this site for Tuesday 13 January 2015; all of which were widely reported in the news media after the events.

Telstra has identified that the effect of these circumstances may apply to an additional 600 services bringing the total number of potential services impacted to approximately 2,300 services. This number may increase as Telstra assesses the full affect of the extreme weather conditions.

Based on current information, the resumption date of normal service operations is expected to be 8 March 2015. This date is indicative only; Telstra customers should anticipate that some further delays may occur. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
