

Customer Service Advice from Telstra

Extreme Weather events impact service in Central Highlands and Coalfields, Capricornia, Central Coast – Whitsundays and Wide Bay and Burnett.

Telstra is working to manage the significant impact to Telstra services that has occurred as a result of a series of extreme weather events in the Central Highlands and Coalfields, Capricornia, Central Coast – Whitsundays and Wide Bay and Burnett region of Queensland on or about Monday 19 January 2015 through to Thursday 22 January 2015.

Due to the effect of damage to the Telstra telecommunications network by severe thunderstorms, there has been a significant increase in the number of Telstra services being reported as faulty. As a result, there has been some disruption to service and delays to normal installation and repair activities.

Telstra apologises to any affected customers.

Information as to the nature of these severe weather events can be sourced from the Bureau of Meteorology (BOM). Heavy rainfall, flash flooding and damaging wind are referred to in the BOM Severe Weather Warning issued for 19 January 2015 initially at 12:21 pm Monday, 19 January 2015; all of which were widely reported in the news media after the events.

Telstra has identified that the effect of these circumstances may apply to approximately 4,400 services. Some of these services may not be installed or repaired within Telstra's standard time frames. The number of possibly affected services may increase or decrease as Telstra assesses the full effect of the extreme weather conditions. Based on current information, the resumption date of Telstra's normal service operations is expected to be 1 March 2015. This date is indicative only, however, and may be subject to change once the full impact of the extreme weather conditions has been assessed. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
