

Customer Service Advice from Telstra

Ongoing Extreme Weather events impact service in North Tropical Coast and Tablelands region of Queensland.

As previously notified by Telstra on Friday 23 January 2015 and Tuesday 3 March 2015, Telstra's normal operations in the North Tropical Coast and Tablelands region of Queensland have been affected by ongoing extreme weather events on or about Friday 16 January 2015 continuing to date.

Telstra's telecommunications network in these areas have experienced high levels of damage that has resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the ongoing weather effects, the expected recovery date has now been further extended to 19 April 2015.

Information as to the nature of these severe weather events can be sourced from the Bureau of Meteorology (BOM). Heavy rainfall is referred to in the BOM Severe Weather Warning issued for 16 January 2015 initially at 6:32 pm Friday, 16 January 2015; all of which were widely reported in the news media after these events.

Telstra has identified that the effect of these circumstances may apply to an additional 1,250 services bringing the total number of potential services impacted to approximately 5,650 services. This number may increase as Telstra assesses the full affect of the ongoing extreme weather conditions.

Based on current information, the resumption date of normal service operations is expected to be 19 April 2015. This date is indicative only; Telstra customers should anticipate that some further delays may occur.

Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
