

Customer Service Advice from Telstra

Severe Weather events impact service in Perth and Greater Metropolitan Perth.

Telstra is working to manage the significant impact to Telstra services that has occurred as a result of a series of low pressure troughs and cold fronts in Perth and the surrounding metropolitan Perth area of Western Australia on or about Friday 19 June 2015 through to Sunday 21 June 2015.

Due to the effect of damage to the Telstra telecommunications network by severe weather, there has been a significant increase in the number of Telstra services being reported as faulty. As a result, there has been some disruption to service and delays to normal installation and repair activities.

Telstra apologises to any affected customers.

Information as to the nature of these severe weather events can be sourced from Weatherzone at <http://www.weatherzone.com.au/>. Heavy rain, thunderstorms and gusty winds across the Perth metropolitan area is detailed within this site for Sunday 21 June 2015; all of which were widely reported in the news media after the events.

Telstra has identified that the effect of these circumstances may apply to approximately 6,450 services. Some of these services may not be installed or repaired within Telstra's standard time frames. The number of possibly affected services may increase or decrease as Telstra assesses the full effect of the extreme weather conditions. Based on current information, the resumption date of Telstra's normal service operations is expected to be 12 July 2015. This date is indicative only, however, and may be subject to change once the full impact of the extreme weather conditions has been assessed. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
