Extreme Weather events impact service in parts of the Northern Rivers District of New South Wales

As previously notified by Telstra on Thursday 3 December 2015, Telstra's normal operations in the Northern Rivers District of New South Wales were affected by a series of extreme weather events on or about Sunday 29 November 2015 through to Monday 30 November 2015. Telstra's telecommunications network in these areas have experienced high levels of damage that resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the continued weather effects, the expected recovery date has now been extended to 24 January 2016.

Telstra has identified that the effect of these circumstances applies to an additional 1,700 services bringing the total number of services impacted to approximately 7,550 services. This number may increase as Telstra assesses the full affect of the extreme weather conditions. Based on current information, the resumption date of normal service operations is expected to be 24 January 2016. This date is indicative only; Telstra customers should anticipate that some further delays may occur. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.

From here the area heads northwest to Doon Doon, west to The Risk, then north to the New South Wales – Queensland border at Coughal. Following the border, the area heads east back to Tweed Heads. All suburbs and towns, off shore islands and coastal areas serviced by Telstra within these boundaries are encompassed in this exemption.

This means that Telstra is notifying customers that normal service time frames may not be met during the period of **1 December 2015 to 24 January 2016** inclusive (based on Telstra's estimated recovery schedule correct at the time of publication of this notice).
