

Customer Service Advice from Telstra

Extreme Weather events impact service in Sydney Metropolitan District.

As previously notified by Telstra on Tuesday 12 January 2016, Telstra's normal operations in the Sydney Metropolitan region of New South Wales were affected by a series of extreme weather events on or about Sunday 3 January 2016 through to Wednesday 6 January 2016. Telstra's telecommunications network in these areas have experienced high levels of damage that resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the continued weather effects, the expected recovery date has now been extended to 20 March 2016.

Telstra has identified that the effect of these circumstances applies to an additional 13,000 services bringing the total number of services impacted to approximately 23,500 services. This number may increase as Telstra assesses the full affect of the extreme weather conditions. Based on current information, the resumption date of normal service operations is expected to be 20 March 2016. This date is indicative only; Telstra customers should anticipate that some further delays may occur. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
