

Customer Service Advice from Telstra

Severe Weather events impact service in part of the North Tropical Coast and Tablelands District of Queensland.

As previously notified by Telstra on Friday 11 March 2016, Telstra's normal operations in part of the North Tropical Coast and Tablelands District of Queensland were affected by a series of severe weather events on or about Thursday 3 March 2016 through to Sunday 6 March 2016. Telstra's telecommunications network in these areas have experienced high levels of damage that resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the continued weather effects, the expected recovery date has now been extended to 17 April 2016.

Telstra has identified that the effect of these circumstances applies to an additional 200 services bringing the total number of services impacted to approximately 1,350 services. This number may increase as Telstra assesses the full affect of the severe weather conditions. Based on current information, the resumption date of normal service operations is expected to be 17 April 2016. This date is indicative only; Telstra customers should anticipate that some further delays may occur. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.

The area turns northeast to Mt Abbot, northwest to Mt Carbine and north to Dagmar then northeast back to Cape Tribulation.
