

Customer Service Advice from Telstra.

Severe Weather events impact service in the Hunter and Central Tablelands Districts and part of the Mid North Coast District of New South Wales.

As previously notified by Telstra on Friday 10 June 2016, Telstra's normal operations in the Hunter and Central Tablelands Districts and part of the Mid North Coast District of New South Wales were affected by a series of severe weather events on or about Saturday 4 June through to Monday 6 June 2016. Telstra's telecommunications network in these areas have experienced high levels of damage that resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the continued weather effects, the expected recovery date has now been extended to 31 July 2016.

Telstra has identified that the effect of these circumstances applies to an additional 8,000 services bringing the total number of services impacted to approximately 16,100 services. This number may increase as Telstra assesses the full affect of the severe weather conditions. Based on current information, the resumption date of normal service operations is expected to be 31 July 2016. This date is indicative only; Telstra customers should anticipate that some further delays may occur. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
