

CUSTOMER SERVICE ADVICE FROM TELSTRA

Staff Redeployment impact service in parts of the southeast Brisbane area of Queensland.

Due to the effect of a series of severe weather events which have caused damage to the Telstra telecommunications network throughout widespread areas of New South Wales, there has been a significant increase in the number of Telstra services being reported as faulty in those regions.

Due to the extent and severity of these ongoing extreme weather events, Telstra is redeploying a large number of staff from across parts of the southeast Brisbane area to the affected regions. As a result, there will be delays to normal installation and repair activities in parts of the Brisbane area as staff from this region are redeployed.

Telstra apologises to any affected customers.

Information as to the nature of these severe weather events can be sourced from the Bureau of Meteorology (BOM). Destructive winds, heavy rainfall and abnormally high tides are referred to in the BOM Severe Weather warning issues for 4 June initially at 4.23pm Saturday 4 June 2016, reference number IDN20032; all of which were widely reported by most of the news media.

Telstra has identified that the effect of these circumstances may apply to approximately 650 services in parts of the southeast Brisbane area. Some of these services may not be installed or repaired within Telstra's standard time frames. The number of possibly affected services may increase or decrease as Telstra assesses the full effect of the extreme weather conditions. Based on current information, the resumption date of Telstra's normal service operations is expected to be 10 July 2016. This date is indicative only, however, and may be subject to change once the full impact of the extreme weather conditions has been assessed. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
