## **Severe Weather events impact service in the North East District of Victoria and parts of the Riverina, South West Slopes and Snowy Mountains Districts of New South Wales.**

Telstra is working to manage the significant impact to Telstra services that has occurred as a result of a series of severe weather events in the North East District of Victoria and parts of the Riverina, South West Slopes and Snowy Mountains Districts of New South Wales on or about Friday 22 July 2016 through to Saturday 23 July 2016.

Due to the effect of damage to the Telstra telecommunications network by severe storms, there has been a significant increase in the number of Telstra services being reported as faulty. As a result, there has been some disruption to service and delays to normal installation and repair activities.

Telstra apologises to any affected customers.

Information as to the nature of these severe weather events can be sourced from the Bureau of Meteorology (BOM). Heavy rainfall and damaging winds are referred to in the BOM Severe Weather Warning issued for 22 July 2016 initially at 5:21 am EST on Friday 22 July 2016, reference number IDV28000; all of which were widely reported in the news media after the events.

Telstra has identified that the effect of these circumstances may apply to approximately 1,550 services. Some of these services may not be installed or repaired within Telstra's standard time frames. The number of possibly affected services may increase or decrease as Telstra assesses the full effect of the severe weather conditions. Based on current information, the resumption date of Telstra's normal service operations is expected to be 21 August 2016. This date is indicative only, however, and may be subject to change once the full impact of the extreme weather conditions has been assessed. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
