

Customer Service Advice from Telstra

Severe Weather events impact service in the Northern Tablelands District and parts of the Northern Rivers, Mid North Coast, North West Slopes and Plains Districts of New South Wales and part of the Darling Downs and Granite Belt District of Queensland.

As previously notified by Telstra on Monday 20 February 2017, Telstra's normal operations in the Northern Tablelands District and parts of the Northern Rivers, Mid North Coast, North West Slopes and Plains Districts of New South Wales and part of the Darling Downs and Granite Belt District of Queensland were affected by a series of severe weather events on or about Thursday 12 January 2017 and Saturday 14 January 2017 through to Sunday 15 January 2017. Telstra's telecommunications network in these areas have experienced high levels of damage that resulted in delays to installation and repair activities on a significant number of Telstra services. Due to the extent of damage to the Telstra network, the impact in the affected region has been greater than initially estimated, and as a consequence of the continued weather effects, the expected recovery date has now been extended to 2 April 2017.

Telstra has identified that the effect of these circumstances applies to an additional 900 services bringing the total number of services impacted to approximately 10,700 services. This number may increase as Telstra assesses the full affect of the severe weather conditions. Based on current information, the resumption date of normal service operations is expected to be 2 April 2017. This date is indicative only; Telstra customers should anticipate that some further delays may occur. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
