

Customer Service Advice from Telstra

Severe Weather events impact service in Mackay and part of the Central Coast-Whitsundays District of Queensland.

Telstra is working to manage the significant impact to Telstra services that has occurred as a result of a series of severe weather events in Mackay and part of the Central Coast-Whitsundays District of Queensland on or about Wednesday 15 February 2017.

Due to the effect of damage to the Telstra telecommunications network by severe thunderstorms, there has been a significant increase in the number of Telstra services being reported as faulty. As a result, there has been some disruption to service and delays to normal installation and repair activities.

Telstra apologises to any affected customers.

Information as to the nature of these severe weather events can be sourced from the Early Warning Network at <http://www.ewn.com.au/alerts/>. Heavy rainfall and flash flooding is referred to within this site for Wednesday 15 February 2017; all of which were reported in the news media after the events.

Telstra has identified that the effect of these circumstances may apply to approximately 500 services. Some of these services may not be installed or repaired within Telstra's standard time frames. The number of possibly affected services may increase or decrease as Telstra assesses the full effect of the severe weather conditions. Based on current information, the resumption date of Telstra's normal service operations is expected to be 12 March 2017. This date is indicative only, however, and may be subject to change once the full impact of the severe weather conditions has been assessed. Telstra regrets any inconvenience caused to customers and thanks them for their patience while this work is being undertaken.
