

Tech Savvy Seniors - Participating Libraries

Tech Savvy Seniors is an initiative of the NSW Ageing Strategy and is funded through a partnership between the NSW Government and Telstra. This program assists seniors who have limited or no experience in using technology to learn new skills, access information online and stay connected with their family, friends and their community. Training is available in English and a number of other languages. Contact one of these libraries for further information on training dates, topics and locations.
