Business Connect for TIPT and DOT Users
Business Connect Overview

- Business Connect is the new UC-One for TIPT and DOT Customers
- Designed to increase business productivity by simplifying the way we communicate
- Business Connect can be deployed on devices such as iPhones, iPads, Android phones and tablets, Apple MAC and PC Desktops with or without Skype for Business
Downloading Business Connect

To download onto the iPhone, Android phone, tablet and iPad download from the App Store and Google Play store.

DOT Users go to Telstra Small Business telstra.com.au/small-business/bundles/smarter-call-management

All other devices – PC desktops (with or without Skype for Business) and Apple MAC will download from the Telstra Resource Centre or the by clicking on the following link: https://enterprise-support.telstra.com.au/t5/Downloads/TIPT-Application-Downloads/ta-p/129
Telstra Toolbars

Telstra Telephone Services Toolbar

Call Control Toolbar
Where will I find the TIPT Toolbar(s) functionality in Business Connect?

Log on/off: Allowed you to log out/in of the Toolbar.

In Business Connect there is no toolbar to Sign In/Out.

**Sign In/Out of Business Connect:**
Enter your sign in information, select *Remember Password* and *Sign In Automatically* and select *Sign In.*
Select *File* (from the Menu bar) and *Sign Out.*
Options

Options: were used to control how the toolbar connects to your phone services and how it integrates with Outlook.

General: Was used to control the auto login settings for the toolbar.

General: This option is no longer required as there is no TIPT toolbar in Business Connect. However we do have automatic sign in options.
Options

**Accounts:** Was used to save your user name and password, so you didn’t have to re-type them each time you log in.

**Sign in automatically and Remember Password:**

To save your *User Name* and *Password*:

- In the Sign in dialog box select *Remember Password* and *Sign in Automatically.*
Options

**Connection:** Was your preconfigured server connections to connect the toolbar to your phone services in order to use the toolbar.

**Business Connect:** The server address is pre-configured and hidden as there will be no need to change.
**Options**

**Dialling Rules:** Was used to specify any digits required to access an outside line.

**Business Connect:** There are no dialling rules and no need to precede an external number with a ‘0’ you just enter the number into the dialpad.
Options

Outlook Integration: Was used to switch on/off Outlook integration and configure the settings on Contact options.

Business Connect Outlook Integration:
When you first Sign into Business Connect you will be prompted to integrate with your Outlook Contacts and Calendar.
Alternatively once you have signed into Business Connect you can switch this option on in Options and Extensions.
Options

**Contacts:** Allowed you to use Outlook contacts as preferred CLID lookup for incoming calls. If a match was found, the caller’s name was displayed on the incoming call notification.

**Outlook Integration:** If you have activated Outlook integration with your Outlook Contacts on the PC and MAC clients you will see the contact details on an incoming call. There is no Outlook integration with the Mobile clients. Ensure the Extension options are switched on in Business Connect.
LDAP Integration: If assigned this option, is configured by your Customer Group Administrator and will be greyed out, so a user will be unable to make changes.

LDAP Integration: LDAP integration is not supported, if required on the PC clients the tags must be setup in Broadworks manually at the User Level.
Options

Web Pop URL: The call notification window launched a pre-configured web page. The web URL's were configured from within the Web Pop URL option.

Websites: This option is not available in Business Connect. You can connect to different websites by using Websites Links.
**Options**

**About:** You used the About option to see what version of the toolbar you are using.

**About:** To check which version of Business Connect you are using.
Telstra Toolbar Services
Where will I find the TIPT Toolbar(s) functionality in Business Connect

**Services:** Services allowed you to access the Services settings.

These options are available in Business Connect via Options

**Anonymous Call Rejection:** Anonymous Call Rejection blocks all incoming calls from people who have restricted their phone numbers from being shown to their call recipients. Anonymous Call Rejection can be enabled or disabled.

To enable:
Select Options > Incoming Calls > Anonymous Call Rejection.
Call Forwarding

There are number of Call Forwarding options to choose from in Business Connect:

- Always
- When Busy
- When No Answer
- When Not Reachable.
Call Forwarding

**Call Forwarding Always**

**Always:** When enabled every call to your desk phone will be forwarded to the number configured.

To enable:
Select **Options > Incoming Calls > Call Forwarding ON** > Select **Always** > Enter Number.
Where will I find the TIPT Toolbar(s) functionality in Business Connect

Call Forward Busy

**When Busy:** Every call to your desk phone will be forwarded to the number configured when you are on another call.

To enable:
Select Options > Incoming Calls > Call Forwarding ON > Select When Busy > Enter Number.
Where will I find the TIPT Toolbar(s) functionality in Business Connect

Call Forward No Answer

**When No Answer:** Every call to your desk phone will be forwarded to the number configured when you do not answer a call after a stipulated number of rings.

To enable:
Select Options > Incoming Calls > Call Forwarding ON > Select When No Answer > Enter Number.
Where will I find the TIPT Toolbar(s) functionality in Business Connect

**Call Forward Not Reachable**

**When Not Reachable:** Calls will be forwarded when your desk phone is not accessible or inactive due to power loss to the site, no network connectivity or no internet access is available.

To enable:
Select Options > Incoming Calls > Call Forwarding ON > Select When Not Reachable > Enter Number.
Do Not Disturb: If you activate this service all calls will be blocked and sent to your voicemail.

To activate:
Select Options > Incoming Calls > Do Not Disturb ON.
Where will I find the TIPT Toolbar(s) functionality in Business Connect

**External Line ID Delivery:** Was used to view the calling line information for incoming calls from external phone numbers.

**External Line ID Delivery:** This happens automatically in Business Connect if the contact is in your contact list.

**Internal Call Line ID Delivery:** This service allowed you to view the calling line information for incoming calls from members of your group.

**Internal Call Line ID Delivery:** This happens automatically in Business Connect.
Where will I find the TIPT Toolbar(s) functionality in Business Connect

**Automatic Call back:** Allowed you to monitor a busy party in your group, and to automatically establish a call on your behalf when he or she becomes available.

**Automatic Call back:** Is available in the Outgoing Calls options.
Where will I find the TIPT Toolbar(s) functionality in Business Connect

**Calling Line ID Delivery Blocking:** This service prevented other parties from seeing your phone number or calling line information when engaged in calls.

To activate in Business Connect:
Select *Options > Outgoing Calls > Block My Caller ID*
Where will I find the TIPT Toolbar(s) functionality in Business Connect

Remote Office: If Remote Office is enabled calls to your desk phone will not arrive through the Business Connect client, the calls will only ring on the device Remote Office has been configured with, i.e. your mobile number or other listed number.

To activate in Business Connect:
Select Options > Incoming Calls > Remote Office ON > Enter the number.
Where will I find the TIPT Toolbar(s) functionality in Business Connect

**Call Waiting:** Call Waiting is switched on by default which means, when a second call arrives Business Connect will immediately place the call on hold and the second call will be answered.

To activate or switch off in Business Connect: Select Options > Incoming Calls > Call Waiting ON.
Voicemail
Voicemail

Voice Management: Enabled you to configure your Voicemail Options.

Voicemail: Business Connect Voicemail options are available to you within the Options menu. To activate: Select Options > Voicemail > Voicemail Service ON > Choose from the available options.
Voicemail

You can select how you want to receive your voicemail messages. You can receive your messages on the phone or via email. Choose from one of the following options:

- **When a message arrives:**
  - Use unified messaging
  - Forward it to this e-mail address
    - test@team.telstra.com.au

- **Notify of any new messages**
  - test@team.telstra.com.au

- **E-mail a carbon copy of message to**
  - test1@team.telstra.com.au
Voicemail

Select *Press ‘0’ to transfer to*, to enable callers to transfer to an alternative phone number by pressing zero, and type the alternative number in the text box.

Select the number of rings before greeting.
Voicemail

Select *Do not allow caller to leave message* if you want your caller to listen to your greeting but cannot leave a message. Select *Disconnect call after greeting* or *Forward call after greeting* and enter a telephone number.
