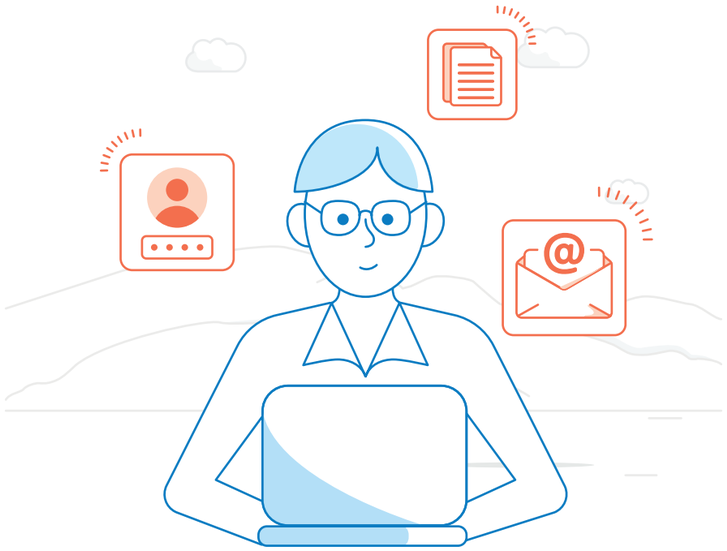
Microsoft 365 for Business

Telstra Business Tech Services



Start with the basics – assess where you're at and get your business online.

Your customers are doing their research online. Are you ready to meet them where they're at? By taking your business online and adopting digital tools, you can connect with customers, give them a great experience and even grow your business.

It starts with making a plan.

$0 Go Digital Consult.

Whether your business is big or small, there are digital solutions available that can help you gain a competitive edge. With a $0 Go Digital Consult, we'll help you achieve your plans for the future with a tailored roadmap and recommendations for your business tools and tech.

With a $0 Go Digital Consult, our Australian-based business experts can discuss how to:

Help keep your business connected.
With the right internet service, IT solutions and devices.

Engage your customers with digital marketing.
Learn marketing strategies designed to help increase sales and raise your brand awareness.

Build a strong online presence.
With recommendations on how to build a website to help you reach customers online.

Better protect your business.
With data protection solutions to help protect your business from online threats.

How it works.

1. Book your call.
Submit a booking form online to choose your preferred appointment date and time.

2. Get a one-on-one strategy session.
You'll get a call from a business expert to discuss the tech tools and business services that may serve you best.

3. Receive a report to help you plan.
After your consult, you'll receive a written report of recommendations designed to help you do more digitally.

Connect and engage with your customers online.

Telstra Business Website Services.

Build a website that reflects your business and helps you attract, retain, engage and convert customers online.

We'll help you build and launch your site – from professional website design and copywriting, to ongoing performance reports and support.

With Telstra Business Website Services, you can:

Get end-to-end support.
From design to launch, we collaborate with you as we build a website that suits your needs.

Benefit from quarterly coaching calls.
Discuss ways to improve and enhance your website with trusted digital experts.

Receive monthly performance reports.
Gain insights into your website performance and recommendations for improving engagement.

Make the most of your digital presence.
We'll assist with marketing campaigns, search engine optimisation, content creation, and more.

Help make customer interactions smooth and secure.

The right technology can help your business be more efficient, more secure, and provide a better experience to your customers. There's no one-size-fits-all solution when it comes to adopting the right technology. It starts with considering your unique pain points and challenges to find a solution that makes your life easier.

Build a secure foundation.

Check Point Harmony.

Discover a security solution for your business mobiles, laptops, emails and collaboration tools that helps detect, prevent, and respond to cyber threats. With Check Point Harmony, have some peace of mind knowing that your lines of business communications are safeguarded, both in-house and while working remotely.

With Check Point Harmony's security technology, you can:

Get securing with one simple application.
Check Point Harmony runs in the background to help secure your business devices, email and collaboration platforms.

Equip your business tools with comprehensive threat detection.
Detect, block, and respond to malicious downloads, and prevent threats with AI and 60+ threat prevention engines.

Add on Managed Security.
Managed Cyber Security - Check Point Harmony provides ongoing behind-the-scenes support to help monitor potential cyber threats, free up your IT resources and leverage the latest security parameters and software updates.

Add on Check Point Harmony installation.
To make life a little easier, we can take care of installation of Check Point Harmony on your mobile devices, computers, networks, programs, email and collaboration tools.

Help keep your systems operating at their best.

Telstra Business Tech Services.

Many businesses aren't big enough to warrant a dedicated IT resource. But often, that leaves the business owner dealing with tech issues – rather than focusing on growing their business.

Leave the IT support to us with Telstra Business Tech Services. Our experts are on call to provide IT support, including helping with hardware, software, and network challenges as they happen – whether they're with Telstra's tech or not.*

With Telstra Business Tech Services, you can:

Get IT support when you need it.
Call us 24/7 for expert IT support, helping you maintain business continuity when things go wrong.

Access on-shore business experts.
We'll act as your IT department, solving your IT challenges big or small and provide 4 tech assessments a year.

Control your business spend.
Experience our month-to-month tech services subscription with the flexibility to cancel anytime.

* Services are not available for some devices and software. On-site support not included. Fair Use Policy applies.
