

# GO PAPERLESS AND START SAVING

Do your thing with time-saving apps from Telstra.

Forget about deciphering handwriting, searching for lost forms or re-keying data back at the office. Canvas replaces all your paper forms with digital versions on your compatible tablet or mobile device.

You can choose from thousands of industry specific templates, create your own or get help from our professional services team.

Capture and verify data when taking an order, conducting audits or performing OH&S checks on-site. You can email data in various formats, store it securely in the cloud or send it off to the office, so your business keeps moving.

Best of all, you can deploy Canvas as a standalone solution or integrate it with your existing systems.

## Canvas is easy to use, and ideal for:

Logs and audits	Assessments	Workflows	Storing profiles
<ul style="list-style-type: none"><li>• Timesheets</li><li>• Delivery confirmations</li><li>• OH&amp;S checklists</li><li>• Service (Install/Repair)</li></ul>	<ul style="list-style-type: none"><li>• Job estimates</li><li>• Stocktaking</li><li>• Inspections</li><li>• Valuations</li></ul>	<ul style="list-style-type: none"><li>• Sales orders</li><li>• Inventory tracking</li><li>• Applications</li><li>• Job work orders</li></ul>	<ul style="list-style-type: none"><li>• Patient records</li><li>• Charity donations</li><li>• Student records</li><li>• Volunteer registrations</li></ul>

# RECOUP THE TIME YOUR BUSINESS IS LOSING WITH PAPER FORMS

We're helping businesses across industry to improve productivity with Canvas.

## CAPTURING DATA ON THE GO

Telstra helped Conservation Volunteers Australia (CVA) innovate through digitising their data collection and reporting processes, which enabled their quick delivery of the Australian Government's Green Army projects.

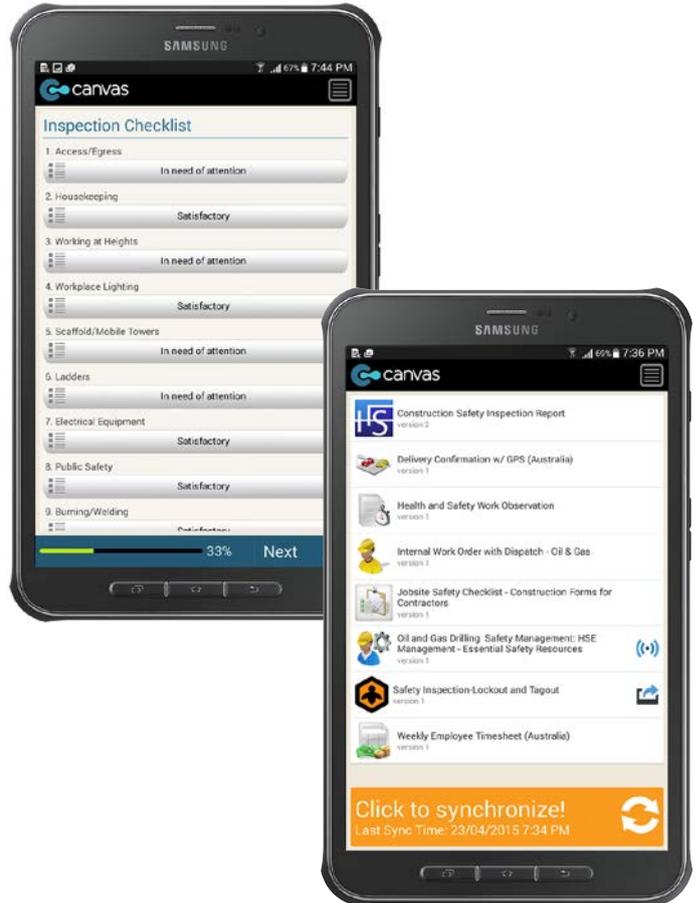

Using a multi-app approach on managed devices connected to the Telstra mobile network, CVA are using Canvas to manage project and participant details for Green Army teams and volunteers wherever they are.

Removing the dependence on manual processes enabled CVA to capture data on the go and provide direction to its Green Army and volunteer teams in near real time.

## TURNING DAYS INTO HOURS

For Telstra's Network Delivery team it would have been a costly exercise to build similar Canvas functionality into its legacy system. With Canvas being a 'ready to go' mobile business app, Telstra's Network Delivery team was able to quickly deploy a solution into the field and realise immediate benefits. Canvas went beyond our expectations and is a fixed component of our future testing, dispatch, maintenance, auditing and inspections roadmap.

## Revolutionise the way work is done

Whether you're a small, medium or very large enterprise, you can use Canvas as a standalone solution or integrate it with your existing enterprise applications and databases.

You can export information directly into Box, Dropbox, Google Drive, Salesforce or Evernote. Or simply leave it all in the Canvas cloud – because it's your personal, searchable database.

If you're looking for a more end-to-end solution, we can help you define, design, deploy and manage the solution through our professional consulting and delivery services.

## Mobilise your business with Telstra

We've picked some of the best productivity apps so you can feel confident that you have the right tools at your fingertips.

We can bring all your mobile services together, including apps, on one bill, which includes your hardware, plan and professional services costs. That means one provider and one point of contact.

We've invested in more coverage sites across city and country (>8,300) so you can enjoy greater and more reliable coverage with fewer dead spots.

So get ready to become productive fast and feel confident that you're unlocking the full benefits of mobility by helping to make your workflow simpler and smarter.
